PART II: ONSITE INT 1. Name(s) of facility reported by the second seco	RODUCTORY MEETIN	<u>G</u>		(check ☑ box for each	•
	resentative still RICHARD	HAISLEY?		- Xes	No
If different, did the fac 3. Is the facility contact and If no, who is?:	cility provide an administrat still LARRY KIDD?	ive update within 30 days	?	Yes Yes	□No □No
	cting VE test(s) during toda ance authority notified at lea				□No □No

Emissions Unit Section 2 – Human Crematory-prim/2ndarychmbrNGfiredtempM&RopacM150lbs/hr

PART I: FILE REVIEW PRIOR TO INSPECTION	(check ☑ box for each	only one question)
 a. Complete AC application or, if no AC permit, initial GP registration received on or after August 30, 1989? b. If yes, were design calculations provided then to confirm a sufficient volume in the 	Xes	No
 secondary chamber combustion zone to provide for at least a 1.0 second gas residence time at 1800 degrees Fahrenheit? 2. Crematory unit installed after February 1, 2007? 3. Date of last inspection: 1/27/2011 	⊠ Yes ⊠ Yes	□No □No
 4. Past Visible Emissions (VE) tests: a. Was a VE test performed within each of the past 4 calendar years? b. Has a VE test been performed yet within the current calendar year? 	Yes Yes	□No ⊠No
 c. If first year of operation, was a VE test performed within 30 days of commencing operation? N/A d. Date of last VE test: 	Xes Yes	No
e. Was the VE test report filed with the compliance authority no later than 45 days after the test?f. Did the facility demonstrate compliance during the last VE test?If no, what was the problem (if known)?	Yes Yes	□No □No
PART II: <u>VISIBLE EMISSIONS TESTING</u>	(check ☑ box for each	only one question)
 Was a visible emissions test conducted by the facility for this unit during this site visit?	🛛 Yes	□No □No □No
c. The visible emission test resulted in an opacity of 0 % for the highest six minute average.d. Did the visible emission test demonstrate compliance with the limit?		□No
 Was a visible emissions test conducted by the inspector during this site visit?	🛛 Yes	□No □No □No
d. Did the visible emission test demonstrate compliance with the limit?3. Is there any reason to ask for a special test to determine compliance with the PM and CO standa		No
If yes, what reason?	Yes	🖾No
PART III: MONITORING/RECORDKEEPING REQUIREMENTS	(check 🗹	only one

		box for each	question)
1.	Were there any objectionable odors detected?	Yes	⊠No
	Downwind odor level detected- Wind direction - Upwind odor level detected-	(1-10)	
2.	Continuous Monitoring Systems –		
	Is a continuous temperature monitoring system installed on each unit to record temperatures in the secondary chamber in accordance with the manufacturer's instructions?	🛛 Yes	No
b	Is the temperature probe properly placed, at least at the distance where the 1.0 second gas residence time at $[1,800^1$ $[1,600^2$ degrees was determined?	Yes	No

PART III: MONITORING/RECORDKEEPING REQUIREMENTS (continued)

c.	Are the following records kept on file, available for inspection, for at least the past two years?		
	1) All temperature measurements	🛛 Yes	No
	2) all continuous monitoring systems, monitoring devices, and performance testing measurements;		
	monitoring system all continuous performance evaluations	🛛 Yes	No
	3) All CEMS or monitoring device calibration checks (last performed on ()	🛛 Yes	No
	4) Adjustments	Yes Yes	No
	5) Preventive maintenance performed on systems/devices	Yes Yes	No
	6) Corrective maintenance performed on systems/devices	🛛 Yes	No
d.	Are the temperature charts properly documented with operator name, operator indication of		
	when cremation in the primary chamber was begun, date, time, and temperature markings	Yes	No
e.	Was the crematory unit installed after $2/1/07$? If no, skip e.(1) – (3)	Yes	No
	(1) Is the crematory unit equipped and operated with a pollutant monitoring system to automatica	lly	
	control combustion based on continuous in-stack opacity measurement?	Yes	No
	(2) Is the system calibrated to restrict combustion in the primary chamber whenever any opacity		
	exceeds 15% opacity ?	Yes	No
	(3) Has the opacity measurement system been cleaned and checked for proper operation in		_
	accordance with the manufacturer's recommended maintenance schedule?	Yes	No

PART IV: SECONDARY COMBUSTION ZONE TEMPERATURES

(check \square only one box for each question)

1.	If the application to construct was <u>BEFORE</u> August 30, 1989 is the: a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber? Yes	No
	b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the cremation process begins in the primary chamber? Yes	No
2.	If the application to construct <u>ON</u> or <u>AFTER</u> August 30, 1989 is the: a. the actual operating temperature of the secondary chamber combustion zone no less than 1600°F	—
	throughout the combustion process in the primary chamber? Yes b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremation	LNo
	process begins in the primary chamber? Yes	□No

PA	ART V: <u>ALLOWED MATERIALS</u>	(check 🗹 box for each	
1.	<i>Other than</i> human or fetal remains with appropriate containers or clothing, are any materials, including biomedical wastes, incinerated in the unit?	Yes	XNo
2.	Do cremation containers contain no more than 0.5 % (percent) by weight chlorinated plastics as certified by the manufacturer?		⊠No □No

PART VI: <u>EQUIPMENT MAINTENANCE</u>	(check 🗹 box for each	•
1. Is the crematory unit maintained in accordance with the manufacturer's specifications?	🛛 Yes	No
 Is there a written plan onsite which addresses the operating procedures during startup, shutdown and malfunction? Does the crematory allow for a visible check on the flame characteristics?	Yes	□No ⊠No □No □No
b. Was the name adjusted when necessary:		
PART VII: EU INSPECTION COMPLIANCE STATUS (check I only one box)		

۱	N COM	PLIANCE
---	-------	---------

SIGNIFICANT Non-COMPLIANCE

Facility Section (continued)

MINOR Non-COMPLIANCE

SPECIAL CONDITIONS AND PROCEDURES	(check 🗹 box for each	only one question)
Administrative Changes: 1. Were there any changes in the name, address, or phone number of the facility or authorized representati associated with a change in ownership or with a physical relocation of the facility or any emissions unit		
2. If yes, did the facility provide written notification within 30 days of the change?	Yes	⊠No □No
New or Modified Process Equipment or Change in Ownership:		
 3. Since the last registration form submittal has there been	 ☐ Yes ☐ Yes ☐ Yes ☐ Yes ☐ Yes ☐ Yes 	⊠No ⊠No ⊠No ⊠No ⊠No

Date of Inspection

3/30/2013

Inspector's Signature

Approximate Date of Next Inspection

COMMENTS:

Visible emissions testing was conducted by Gene Schaltenbrand of Brooks and Associates. The facility has two cremators on site a relocated remodeled animal cremator and a new unit for human remains.

Burn charts for the human cremator were readily available for review that properly displayed the operator name, burn time, temperature, and date. The animal cremator was not used prior to this day thus temperature charts were not available. The cremator can be controlled remotely via computer. The staff was asked to start a log book to notate calibrations and equipment maintenance. The facility was found to be well maintained and all of the equipment was found to be in excellent condition. No visible emissions were observed.
