

Florida Department of Environmental Protection
ARM Inspection Report

ARMS ID No. 1110051	Owner/Company Name: RINKER MATERIALS CORP	Inspection Date: 5/22/08
------------------------	--	-----------------------------

Site Name: RINKER/FT PIERCE/MIDWAY RD	County: ST. LUCIE
--	----------------------

Permit No(s). 1110051003AG	Expiration Date: May 21, 2009	Type: AG
-------------------------------	----------------------------------	-------------

Facility Contact Name: Arlington Bill Arlington Environmental	Title:	Phone: —
---	--------	-------------

Emissions Unit(s):	Compliance Status:
DD2 - Flyash silo	IN

Field Observations:

Observed VE test performed for flyash silo only. Bill Arlington took readings during loading of silo @ 5 psi.

Observed facility grounds to be dry but free of accumulated particulate matter. Some dust generated by truck movement within facility. No emissions traveled past facility property boundaries. Dust generated at east end of facility near rock crushing area and near batcher at 001, which was not in operation. More frequent implementation of reasonable precautions would be better.

Block plant #2 (002) is currently the only block plant in operation. Plant #1 (001) has been in shutdown since Nov. 2007.

Advised Mr. Arlington of the dust emissions. He indicated he would advise his personnel.

Inspector's Name Allen Rainey	Signature: Allen J. Rainey	Date: 5/22/08
