Bri	ief Notes:					
	the Authorized Repression, who is?:	entative still JASON JONES	S?		X Yes	□No
3. Is t		y provide an administrative JASON JONES?				□No □No
		g VE test(s) during today's e authority notified at least				□No □No

Emissions Unit Section 1 –CCB Plant-weigh hopper/loadout w/central dust collector subject to 5% Opacity Limit

1.	Date of last inspection: 1/11/12 Past Visible Emissions (VE) tests: a. Was a VE test performed within each of the past 4 calendar years?	⊠ Yes	only one question) No No No No No No No No
	 j. What was the actual batching rate? tons/hour k. Did the emissions unit demonstrate compliance with the 5% opacity limit during the last VE test? If not, what was the problem (if known)? 	⊠ Yes	□ No
PA	RT II: STACK EMISSIONS from a silo, weigh hopper(batcher) or other enclosed storage and conveying equipment	(check 🗹 box for each	only one question)
1.	Was a visible emissions test conducted by the facility for this unit during this site visit?	⊠ Yes	☐ No
	a. Was the visible emissions test conducted according to EPA Method 9?	⊠ Yes	☐ No
	 b. The visible emission test resulted in an opacity of <u>0</u> % for the highest six-minute average. c. Did the visible emissions test demonstrate compliance with the 5% opacity limit?	⊠ Yes	□ No
	d. During visible emissions tests of the silo dust collector exhaust points was the loading of the silo contact that is representative of the normal silo loading rate? Yes No N/A – silo not load e. If silo loaded, was the minimum loading rate of 25 tons/hour achievable in practice?	ded during insp	
	g. Are emissions from the weigh hopper (batcher) operation controlled by the silo dust collector? If YES, then continue on to questions $g.1) - g.3$) below. If answer NO, then skip $g.1) - g.3$) and go to	Yes	⊠ No
	1) Was the weigh hopper (batcher) in operation during the visible emissions test?	Yes Yes	☐ No
	duration?	Yes	☐ No
	 3) What was the batching rate?tons/hour. What was the batching duration? minuth. h. 1) If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which from the silo dust collector, was the visible emissions test of the weigh hopper (batcher) dust collector. 	n is separate	
	conducted while batching at a rate that is representative of the normal batching rate and duration 2) What was the batching rate? tons/hour. What was the batching duration? minut		☐ No
2.	Was a visible emissions test conducted by the inspector for this unit during this site visit? a. Was the visible emissions test conducted according to EPA Method 9? b. The visible emission test resulted in an opacity of % for the highest six-minute average.	☐ Yes	⊠ No □ No
	c. Did the visible emissions test demonstrate compliance with the 5% opacity limit?d. What was the process rate? tons/hour.	Yes	□ No

Emissions Unit Section 2 –CCB Southern Plant-silo (flyash/cement) w/silotop baghouse subject to 5% Opacity Limit

1. Date of last inspection: 9/7/06 2. Past Visible Emissions (VE) tests: a. Was a VE test performed within each of the past 4 calendar years?	(check ☑ box for each ☐ Yes	only one question) No No No No No No No
j. What was the actual batching rate? tons/hour k. Did the emissions unit demonstrate compliance with the 5% opacity limit during the last VE test? If not, what was the problem (if known)?	Yes	□ No
PART II: STACK EMISSIONS from a silo, weigh hopper(batcher) or other enclosed storage and conveying equipment	(check 🗹 box for each	only one question)
1. Was a visible emissions test conducted by the facility for this unit during this site visit?	⊠ Yes	☐ No
a. Was the visible emissions test conducted according to EPA Method 9?	⊠ Yes	☐ No
 b. The visible emission test resulted in an opacity of % for the highest six-minute average. c. Did the visible emissions test demonstrate compliance with the 5% opacity limit?	⊠ Yes	□ No
 d. During visible emissions tests of the silo dust collector exhaust points was the loading of the silo co that is representative of the normal silo loading rate? ∑ Yes ☐ No ☐ N/A – silo not load e. If silo loaded, was the minimum loading rate of 25 tons/hour achievable in practice?	ded during ins	
f. What was the silo loading rate? tons/hour g. Are emissions from the weigh hopper (batcher) operation controlled by the silo dust collector?	☐ Yes	⊠ No
If YES, then continue on to questions $g.1) - g.3$) below. If answer NO, then skip $g.1) - g.3$) and go to	h	
 Was the weigh hopper (batcher) in operation during the visible emissions test? During the visible emissions test, was the batching rate representative of the normal batching ra 		∐ No
duration? 3) What was the batching rate? tons/hour. What was the batching duration? minu h. 1) If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which from the silo dust collector, was the visible emissions test of the weigh hopper (batcher) dust coll	ites n is separate	☐ No
conducted while batching at a rate that is representative of the normal batching rate and duration	Yes Yes	☐ No
2) What was the batching rate? tons/hour. What was the batching duration? minute 2. Was a visible emissions test conducted by the inspector for this unit during this site visit? a. Was the visible emissions test conducted according to EPA Method 9? b. The visible emission test resulted in an opacity of % for the highest six-minute average. a. Did the visible emissions test demonstrate compliance with the 5% consists limit?	Yes Yes	□ No □ No
c. Did the visible emissions test demonstrate compliance with the 5% opacity limit? d. What was the process rate? tons/hour.	∐ Yes	☐ No

Emissions Unit Section 3 -CCB Northern Plant-silo (flyash/cement) w/silotop baghouse subject to 5% Opacity Limit

1. Date of last inspection: 97.06 2. Past Visible Emissions (VED) tests: a. Was a VE test performed within each of the past 4 calendar years? ──		ART I: FILE REVIEW PRIOR TO INSPECTION	(check ☑ box for each	only one
c. If first year of operation, was a VE test performed within 30 days of commencing operation?		Past Visible Emissions (VE) tests: a. Was a VE test performed within each of the past 4 calendar years?	☐ Yes	⊠ No
c. Was the VE test report filed with the compliance authority no later than 45 days after the test?		c. If first year of operation, was a VE test performed within 30 days of commencing operation? N/A	_	
whether or not batching occurred during emissions testing?		e. Was the VE test report filed with the compliance authority no later than 45 days after the test?f. Did the report state the actual silo loading rate during emissions testing?		
PART II: STACK EMISSIONS from a silo, weigh hopper(batcher) or other enclosed storage and conveying equipment 1. Was a visible emissions test conducted by the facility for this unit during this site visit? ————————————————————————————————————		whether or not batching occurred during emissions testing? N/A i. Did the test report state the actual batching rate during emissions testing?		=
enclosed storage and conveying equipment box for each question) 1. Was a visible emissions test conducted by the facility for this unit during this site visit?			Yes	□ No
1. Was a visible emissions test conducted by the facility for this unit during this site visit? —	PA			•
a. Was the visible emissions test conducted according to EPA Method 9?		enclosed storage and conveying equipment	box for each	question)
b. The visible emission test resulted in an opacity of 0 % for the highest six-minute average. c. Did the visible emissions test demonstrate compliance with the 5% opacity limit?	1.	Was a visible emissions test conducted by the facility for this unit during this site visit?	⊠ Yes	☐ No
c. Did the visible emissions test demonstrate compliance with the 5% opacity limit?			⊠ Yes	☐ No
that is representative of the normal silo loading rate? Yes No N/A – silo not loaded during inspection. e. If silo loaded, was the minimum loading rate of 25 tons/hour achievable in practice? Yes No f. What was the silo loading rate? tons/hour g. Are emissions from the weigh hopper (batcher) operation controlled by the silo dust collector? Yes No If YES, then continue on to questions g.1) – g.3) below. If answer NO, then skip g.1) – g.3) and go to h. 1) Was the weigh hopper (batcher) in operation during the visible emissions test? Yes No 2) During the visible emissions test, was the batching rate representative of the normal batching rate and duration? Yes No 3) What was the batching rate? tons/hour. What was the batching duration? minutes h. 1) If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which is separate from the silo dust collector, was the visible emissions test of the weigh hopper (batcher) dust collector conducted while batching at a rate that is representative of the normal batching rate and duration? Yes No 2) What was the batching at a rate that is representative of the normal batching rate and duration? Yes No 2) What was the batching rate? tons/hour. What was the batching duration? minutes. 2. Was a visible emissions test conducted by the inspector for this unit during this site visit? Yes No b. The visible emission test conducted according to EPA Method 9? Yes No b. The visible emissions test demonstrate compliance with the 5% opacity limit? Yes No		c. Did the visible emissions test demonstrate compliance with the 5% opacity limit?	⊠ Yes	☐ No
f. What was the silo loading rate? tons/hour g. Are emissions from the weigh hopper (batcher) operation controlled by the silo dust collector? Yes No If YES, then continue on to questions g.1) - g.3) below. If answer NO, then skip g.1) - g.3) and go to h. 1) Was the weigh hopper (batcher) in operation during the visible emissions test? Yes No 2) During the visible emissions test, was the batching rate representative of the normal batching rate and duration? Yes No 3) What was the batching rate? tons/hour. What was the batching duration? minutes h. 1) If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which is separate from the silo dust collector, was the visible emissions test of the weigh hopper (batcher) dust collector conducted while batching at a rate that is representative of the normal batching rate and duration? Yes No 2) What was the batching rate? tons/hour. What was the batching duration? minutes. 2. Was a visible emissions test conducted by the inspector for this unit during this site visit? Yes No a. Was the visible emissions test conducted according to EPA Method 9? Yes No b. The visible emission test resulted in an opacity of 0 % for the highest six-minute average. c. Did the visible emissions test demonstrate compliance with the 5% opacity limit? Yes No		that is representative of the normal silo loading rate? 🖂 Yes 🔲 No 🔲 N/A – silo not load	led during insp	pection.
If YES, then continue on to questions g.1) – g.3) below. If answer NO, then skip g.1) – g.3) and go to h. 1) Was the weigh hopper (batcher) in operation during the visible emissions test? ————————————————————————————————————		f. What was the silo loading rate? tons/hour	Yes	
1) Was the weigh hopper (batcher) in operation during the visible emissions test?				⊠ No
duration?		1) Was the weigh hopper (batcher) in operation during the visible emissions test?	Yes Yes	☐ No
 h. 1) If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which is separate from the silo dust collector, was the visible emissions test of the weigh hopper (batcher) dust collector conducted while batching at a rate that is representative of the normal batching rate and duration? Yes No 2) What was the batching rate? tons/hour. What was the batching duration? minutes. 2. Was a visible emissions test conducted by the inspector for this unit during this site visit? Yes No a. Was the visible emissions test conducted according to EPA Method 9? Yes No b. The visible emission test resulted in an opacity of 0 % for the highest six-minute average. c. Did the visible emissions test demonstrate compliance with the 5% opacity limit? Yes No 		duration?	Yes	☐ No
conducted while batching at a rate that is representative of the normal batching rate and duration? 2) What was the batching rate? tons/hour. What was the batching duration? minutes. 2. 		c. Did the visible emissions test demonstrate compliance with the 5% opacity limit?	⊠ Yes	☐ No

Emissions Unit Section 4 -CCB Shortest Plant-silo (flyash/cement) w/silotop baghouse subject to 5% Opacity Limit

PART I: FILE REVIEW PRIOR TO INSPECTION 1. Date of last inspection: 9/7/06 2. Past Visible Emissions (VE) tests: a. Was a VE test performed within each of the past 4 calendar years?	☐ Yes	only one question) No No No No No No No
j. What was the actual batching rate? tons/hour k. Did the emissions unit demonstrate compliance with the 5% opacity limit during the last VE test? If not, what was the problem (if known)?	Yes	□ No
PART II: STACK EMISSIONS from a silo, weigh hopper(batcher) or other enclosed storage and conveying equipment	(check 🗹 box for each	only one question)
1. Was a visible emissions test conducted by the facility for this unit during this site visit?	⊠ Yes	☐ No
a. Was the visible emissions test conducted according to EPA Method 9?	Yes	☐ No
 b. The visible emission test resulted in an opacity of % for the highest six-minute average. c. Did the visible emissions test demonstrate compliance with the 5% opacity limit?	Yes	☐ No
 d. During visible emissions tests of the silo dust collector exhaust points was the loading of the silo conthat is representative of the normal silo loading rate? Yes No N/A – silo not loade. e. If silo loaded, was the minimum loading rate of 25 tons/hour achievable in practice?	ded during ins	
f. What was the silo loading rate? tons/hour g. Are emissions from the weigh hopper (batcher) operation controlled by the silo dust collector?	☐ Yes	□ No
If YES, then continue on to questions $g.1) - g.3$) below. If answer NO, then skip $g.1) - g.3$) and go to 1) Was the weigh hopper (batcher) in operation during the visible emissions test?	h	□ No
2) During the visible emissions test, was the batching rate representative of the normal batching ra	te and	
duration? 3) What was the batching rate? tons/hour . What was the batching duration? minute. h. 1) If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which from the silo dust collector, was the visible emissions test of the weigh hopper (batcher) dust collector.	ites n is separate	□ No
conducted while batching at a rate that is representative of the normal batching rate and duration	? Yes	☐ No
2) What was the batching rate? tons/hour. What was the batching duration? minute 2. Was a visible emissions test conducted by the inspector for this unit during this site visit?a. Was the visible emissions test conducted according to EPA Method 9?	Yes Yes	□ No □ No
c. Did the visible emissions test demonstrate compliance with the 5% opacity limit?d. What was the process rate? tons/hour.	∐ Yes	☐ No

Facility Section (continued)

CO	ONFIRMATION OF GENERAL PERMIT ELIGIBILITY	(-1.	1. 17	1
			neck 🗹 (for each c	
1.	Does this facility keep records to show that it does not have the potential to emit: a. 10 tons per year or more of any hazardous air pollutant? b. 25 tons per year or more of any combination of hazardous air pollutants? c 100 tons per year or more of any other regulated air pollutant?		Yes Yes Yes	No No No No
2.	Does this facility include: a. Any emission units or activities not covered by the applicable air general permit (with the exception units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) or Rule 62-4.040, F.A.C.)? If YES, what non-exempt units or activities?		Yes	⊠ No
	b. Any emissions units or activities authorized by another air general permit where such other air gener permit and this general permit specifically allow the use of one another at the same facility?		Yes	⊠ No
3.	Is the total combined annual facility-wide fuel usage of all plants less than or equal to: a. 275,000 gallons of diesel fuel? b. 23,000 gallons of gasoline? c. 44 million standard cubic feet on natural gas? d. 1.3 million gallons of propane? e. Or an equivalent prorated amount if multiple fuels are used onsite (use equation below)?		Yes Yes Yes Yes Yes	No No No No No No No No No
4.	gal diesel/yr + gal gasoline/yr + MM SCF nat. gas/yr + MM gal proparate 275,000 gal diesel/yr 23,000 gal gasoline/yr + 44 MM SCF nat. gas/yr + 1.3 MM gal proparate Has the owner/operator maintained, available for inspection, site-wide records of monthly fuel consumer 12	ption		
	for each consecutive 12-period for the past 5 years?		Yes	⊠ No
GI	ENERAL CONDITIONS		neck 🗹 of	
	Has the owner or operator allowed the circumvention of any air pollution control device, or allowed the emission of air pollutants without the proper operation of all applicable air pollution control devices?	🗆	Yes	⊠ No
2.	Does the owner or operator: a. Maintain the authorized facility in good condition?	. 🗆	Yes	⊠ No
3	b. Ensure that the facility maintains its eligibility to use the air general permit and complies with all terms and conditions of the air general permit?		Yes	⊠ No
٦.	to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?		Yes	⊠ No

CATABLE PLANT:	(abook 17
	(check ☑ only one box for each question)
e facility: stationary [; relocatable []; or consisting of both stationary and relocatable [concrete batching and/or nonmetallic mineral processing plants? (<i>If only stationary, skip the f</i>	
2. Is the relocatable concrete batching plant used to mix cement and	
soil for onsite soil augmentation or stabilization? (If YES, answer 2. a and 2.b; if NO, answer question 2.c below.)	Yes No
a. Did the owner or operator notify the appropriate Department or Local Air Program by telep	hone,
e-mail, fax, or written communication at least one business day prior to changing location?	
b. Did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-2 to the Department or Local Air Program no later than five business days following a relocat	
c. Did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-21	[0.900(6)]
to the appropriate Department or Local Air Program at least five business days prior to relocate to the appropriate Department or Local Air Program at least five business days prior to relocate to the appropriate Department or Local Air Program at least five business days prior to relocate to the appropriate Department or Local Air Program at least five business days prior to relocate to the appropriate Department or Local Air Program at least five business days prior to relocate to the appropriate Department or Local Air Program at least five business days prior to relocate to the appropriate Department or Local Air Program at least five business days prior to relocate to the appropriate Department or Local Air Program at least five business days prior to relocate to the appropriate Department of the Air Program at least five business days prior to relocate to the appropriate Department of the Air Program at least five business days are also below to the appropriate to the Air Program at least five business days at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business days are also below to the Air Program at least five business da	cation? \[Yes \[No
3. If the relocatable plant was co-located at a facility with a separate air construction or air opera	ation permit,
and the relocatable batch plant is not included as an emissions unit in that separate permit: a. Was the relocatable batch plant being used for a non-routine purpose (i.e, there is no repeate	ed usage)? Yes No
If YES, what was the purpose?	ed usage):
b. Were records kept by the owner/operator to indicate how long it was co-located at the permitted facility?	□ V ₂₂ □ N ₂
If YES, were any periods more than 6 months in duration?	Yes No
, , , , , , , , , , , , , , , , , , ,	
CHANGES	(check ☑ only one
Administrative Changes:	box for each question)
1. Were there any changes in the name, address, or phone number of the facility or authorized rej	
associated with a change in ownership or with a physical relocation of the facility or any emission operations comprising the facility; or any other similar minor administrative change at the facility.	
2. If YES, did the facility provide written notification within 30 days of the change?	
New or Modified Process Equipment or Change in Ownership: 3. Since the last registration form submittal has there been	
a. Installation of any new process equipment?	
b. Alterations to existing process equipment without replacement?	
c. Replacement of existing equipment with equipment that is substantially different?d. A change in ownership?	
4. If the answer to any question 3a. – d. is YES, was a new registration form and the appropriate 30 days prior to the change?	
	٠٠٠ تــ تــ

Inspector's Name (Please Print) Date of Inspection	<u></u>
Inspector's Signature Approximate Date of I	N

COMMENTS: EU 4 was overfilled which created visible emission out of the silo's pop off valve. The tanker was halted because there was a large project that Cemex was providing concrete. It was suggested to continue the test after the cement was lowered in the silo. The plant manager wanted to cancel the test and redo the test.
