

HUMAN CREMATORY

COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2) COMPLAINT/DISCOVERY (CI)]						
RE-INSPECTION (FUI) ARMS COMPLAINT NO:							
AIRS ID#: 0550022 DATE: <u>01/09/2014</u> ARRIVE: <u>12:50 pm</u> DEPA	RT: <u>2:35 pm</u>						
FACILITY NAME: LAKE FOREST CREMATORY							
FACILITY LOCATION: 507 US HWY 27 N							
AVON PARK 33825							
OWNER/AUTHORIZED REPRESENTATIVE: JASON MILLER Email: CONTACT NAME: Email: ENTITLEMENT PERIOD: 8/2/2009 / 8/2/2014 (effective date) (end date) PHONE: (863)453 Mobile: PHONE: Mobile:	-3134						
Facility Section PART I: INSPECTION COMPLIANCE STATUS (check ☑ only one box) ☑ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE							
DADE H. ONGREE INTERODUCTORY MEETING							
PART II: ONSITE INTRODUCTORY MEETING 1. Name(s) of facility representative(s):	(check ☑ only one box for each question)						
Brief Notes: Met with facility consultant, Bill Arlington, Arlington Environmental, on site for rec	valibration & VE test						
Is the Authorized Representative still JASON MILLER? If no, who is?:							
If different, did the facility provide an administrative update within 30 days? 3. Is the facility contact still?							
4. Will facility be conducting VE test(s) during today's inspection? If yes, was the compliance authority notified at least 15 days in advance?							

Emissions Unit Section 2 – Human Crematory-prim/2ndary chmbrw/opacitymonitor,temp.recor

D٨	ART I: FILE REVIEW PRIOR TO INSPECTION		
I A	ART 1. FILE REVIEW I RIOK TO INSI ECTION	(check 🗹	only one
		box for each	question)
1	Complete AC analization on if we AC association in this CD provides a consistent on an		
1.	a. Complete AC application or, if no AC permit, initial GP registration received on or	N 11	
	after August 30, 1989?	⊠ Yes	□No
	b. If yes, were design calculations provided then to confirm a sufficient volume in the		
	secondary chamber combustion zone to provide for at least a 1.0 second gas residence time		
	at 1800 degrees Fahrenheit?	Yes	□No
2.	Crematory unit installed after February 1, 2007?	Yes	⊠No
	Date of last inspection: 5/26/2011	_	_
	Past Visible Emissions (VE) tests:		
٦.	a. Was a VE test performed within each of the past 4 calendar years?	Yes	□No
	b. Has a VE test been performed yet within the current calendar year?	=	= "
		⊠ Yes	∐No
	c. If first year of operation, was a VE test performed within 30 days of commencing	- -	
	operation? N/A	⊠ Yes	□No
	d. Date of last VE test: 9/4/12		
	e. Was the VE test report filed with the compliance authority no later than 45 days after the test?	Yes	□No
	f. Did the facility demonstrate compliance during the last VE test?	· 🛛 Yes	□No
	If no, what was the problem (if known)?		
	, and an		
PA	ART II: <u>VISIBLE EMISSIONS TESTING</u>	(check 🗹	only one
		box for each	•
		box for cach	question)
1.	Was a visible emissions test conducted by the facility for this unit during this site visit?	Yes	□No
	a. Was the test conducted with the unit operating at a capacity of one adult-sized cadaver?		□No
	b. Was the visible emissions test conducted according to EPA Method 9?		□No
	b. Was the visible emissions test conducted according to Li A wethod 7:	103	
	c. The visible emission test resulted in an opacity of 0 % for the highest six minute average.		
		⊠ Yes	□ Na
	d. Did the visible emission test demonstrate compliance with the limit?		□No
	(5% opacity, six-minute average, except that visible emissions not exceeding 15% opacity shall be allowed for up to six minutes	in any one-hour)	
_		_ **	N
2.	Was a visible emissions test conducted by the inspector during this site visit?		⊠No
	a. Was the test conducted with the unit operating at a capacity of one (1) adult-sized cadaver?		□No
	b. Was the visible emissions test conducted according to EPA Method 9?	· U Yes	□No
	c. The visible emission test resulted in an opacity of % for the highest six minute average.		
	d. Did the visible emission test demonstrate compliance with the limit?	- Yes	□No
3.	Is there any reason to ask for a special test to determine compliance with the PM and CO standar		
		☐ Yes	⊠No
	If yes, what reason?	_	_
	7 · · , · · · · · · · · · · · · · · · · · · ·		
			- 1
PA	ART III: MONITORING/RECORDKEEPING REQUIREMENTS	(check 🗹	only one
		box for each	•
		oon for cach	question
1.	Were there any objectionable odors detected?	Yes	⊠No
	An upwind/downwind survey of the facility was conducted. The observed parameters were:	_	_
	Downwind odor level detected- Wind direction - Upwind odor level detected-	(1-10)	
	2 5 1 1 1 1 detected 1 1 1 1 detected 5 1 1 1 1 detected 5 1 detected 5 1 1 detected 5 1 d	(- 10)	
2	Continuous Monitoring Systems –		
	Is a continuous temperature monitoring system installed on each unit to record temperatures in the		
а		V	□ N-
1.	secondary chamber in accordance with the manufacturer's instructions?	Yes	∐No
b	Is the temperature probe properly placed, at least at the distance where the 1.0 second gas residence	N **	
	time at \square 1,800 ¹ \square 1,600 ² degrees was determined?	⊠ Yes	∐No
	(Application or initial notification: ¹ received on or after 8/30/89; ² received before 8/30/89)		

DADT III. MONITODING/DECODD/CEDING DECUIDEMENTS (
PART III: MONITORING/RECORDKEEPING REQUIREMENTS (continued)		
c. Are the following records kept on file, available for inspection, for at least the past two years?		
1) All temperature measurements	⊠ Yes	□No
2) all continuous monitoring systems, monitoring devices, and performance testing measurements;		
monitoring system all continuous performance evaluations	Yes	□No
3) All CEMS or monitoring device calibration checks (last performed on ()	Yes	∐No
4) Adjustments	Yes	∐No
5) Preventive maintenance performed on systems/devices	∑ Yes	∐No
6) Corrective maintenance performed on systems/devices	⊠ Yes	∐No
d. Are the temperature charts properly documented with operator name, operator indication of		
when cremation in the primary chamber was begun, date, time, and temperature markings	Yes	□No
e. Was the crematory unit installed after 2/1/07 ? If no, skip e.(1) – (3)	Yes Yes	⊠No
(1) Is the crematory unit equipped and operated with a pollutant monitoring system to automatical		
control combustion based on continuous in-stack opacity measurement?	☐ Yes	∐No
(2) Is the system calibrated to restrict combustion in the primary chamber whenever any opacity exceeds 15% opacity?	□ Vaa	□ Na
(3) Has the opacity measurement system been cleaned and checked for proper operation in	∐ Yes	∐No
accordance with the manufacturer's recommended maintenance schedule?	☐ Yes	□No
accordance with the manufacturer's recommended maintenance schedule:		
	_	a
PART IV: SECONDARY COMBUSTION ZONE TEMPERATURES	(check 🗹	only one
	box for each	question)
4. Yo. 1		
1. If the application to construct was BEFORE August 30, 1989 is the:		
a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?	Yes	⊠No
b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the cremati		△ N0
process begins in the primary chamber?	Yes	⊠No
		2310
2. If the application to construct <u>ON</u> or <u>AFTER</u> August 30, 1989 is the:		
a. the actual operating temperature of the secondary chamber combustion zone no less than 1600°F		
	N /1 x z	
throughout the combustion process in the primary chamber?	⊠ Yes	□No
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati	o <u>n</u>	
		□No
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati	o <u>n</u>	
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati process begins in the primary chamber?	on ⊠ Yes	□No
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati	on ⊠ Yes (check ☑	□No
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati process begins in the primary chamber?	on ⊠ Yes	No
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati process begins in the primary chamber?	on ⊠ Yes (check ☑	No
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati process begins in the primary chamber?	Yes (check 🗹 box for each	only one question)
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati process begins in the primary chamber?	on ⊠ Yes (check ☑	□No
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati process begins in the primary chamber?	Yes (check 🗹 box for each	only one question)
b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremati process begins in the primary chamber?	Yes (check 🗹 box for each	only one question)

PART VI: EQUIPMENT MAINTENANCE		(check 🗹 box for each	
1. Is the crematory unit maintained in accordance with the man	ufacturer's specifications?	∑ Yes	□No
2. Is there a written plan onsite which addresses the operating p shutdown and malfunction?3. Does the crematory allow for a visible check on the flame ch			□No ⊠No
If no, skip a. – b. a. Was the flame characteristic visually checked at least onc b. Was the flame adjusted when necessary?			□No □No
PART VII: EU INSPECTION COMPLIANCE STATUS (c	check 🗹 only one box)		
☐ IN COMPLIANCE ☐ MINOR Non-COMPLIAN		LIANCE	
Facility Sec	tion (continued)		
SPECIAL CONDITIONS AND PROCEDURES		(check ✓ box for each	only one h question)
Administrative Changes: 1. Were there any changes in the name, address, or phone number associated with a change in ownership or with a physical releoperations comprising the facility; or any other similar minor	ocation of the facility or any emissions un	its or	⊠No
2. If yes, did the facility provide written notification within 30 of			⊠No ⊠No
New or Modified Process Equipment or Change in Ownership: 3. Since the last registration form submittal has there been a. Installation of any new process equipment? b. Alterations to existing process equipment without re c. Replacement of existing equipment with equipment d. A change in ownership?	eplacement? that is substantially different? ation form and the appropriate fee	Yes Yes Yes Yes Yes Yes	□No □No □No □No □No □No □No
ROBERT J. STEWART	1/9/2014

Robert J. Stewart	1/2015		
Inspector's Signature	Approximate Date of Next Ins	pection	

COMMENTS: Compliance inspection conducted to check and re-calibrate the temperature sensor of the crematory unit in order to determine if the digital reading from the unit was the same as the reading on the circular temperature chart recording. Inspection revealed that the temperature from the digital display and the chart recording was off by 50 degrees F. A visible emissions test was

then conducted with one adult size cadaver. The VE test was found to be within opacity limits and in compliance. However, it was noted that during the test at approximately 2:43 pm, that the digital temperature indicator on the crematory unit was reading below 1600 degrees F (around 1543 degrees F). The operator was informed and it was found that the throat Air switch had been activated and when it was turned off the temperature returned to above 1600 degrees F for the remainder of the test. After the test, the pen on the chart recording device was adjusted to match the digital temperature indicator and also the time of day indication on the circular recording chart (See attached e-mailed chart recordings from the facility)
