COMMENTS: INS2 conducted in conjunction with VEs performed. Entire property was extremely wet & no uncontrolled emissions were observed leaving the property. No dust was observed under the weigh hopper in significant amounts. The cement loading rate was ~ 29.83 tph & the flyash loading rate was ~ 32.08 tph. Diesel fuel usage was significantly under the permit limit of 240,000 gallons/year & the fuel oil sulfur content was less than .05% by weight (verified by the last fuel delivery on 1/5/09 of 15 ppm max sulfur). Daily/monthly material logs are kept on the computer. OCEPD personnel notified Mr. Allan Herzberger, the plant manager, that the current air permit expires on July 25, 2009. The home office was notified in the presence of OCEPD personnel.
