**COMMENTS:** The east-most incinerator, Ener-Tek IE7E Model IE43ET, has a rusty stack. This unit was tested for 60 minutes. The observed opacity was zero percent. The operating rate for this unit is 160 lbs/hour. A 150 lb body was incinerated. The afterburner temperature was greater than 1600 ° F. The paper recorder was reading 84 ° below the digital temperature. A service call was placed and the recorder was recalibrated to correct the temperature reading on 7/11/08. The west-most incinerator, a Super Power Pak, Model IE43-SPP, was also tested for visible emissions. The observed opacity was zero percent. The operating rate for this unit is also 160 lb/hr. A 150 lb body was incinerated. The afterburner temperature was greater than 1600 ° F.
