|---|--|--|
| (check ☑ appropriate box(es))   |  |  |
|   |  |  |
| <u>Unconfined Emissions</u> – (Rule 62-296.320(4)(c), F.A.C.)   |  |  |
| 1. Does the owner /operator of the concrete batching plant take reasonable precautions to control unconfined  |  |  |
| emissions by:   |  |  |
| a) management of roads, parking areas, stock piles, and yards, which shall include one or more of the following:  |  |  |
| 1) paving and maintenance of roads, parking areas, stock piles, and yards? \bigsymbol{\times} Yes \bigsymbol{\times} No   |  |  |
| 2) application of water or environmentally safe dust-suppressant chemicals when necessary to control  |  |  |
| emissions?  |  |  |
|   | er paved areas under control of the owner/operator to                          |  |
| re-entrainment, and from building or work areas to reduce airborne particulate matter? \overline{\text{Yes}} \overline{\text{D}}\text{No}                                       |  |  |
| 4) reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of   |  |  |
| particulate matter from stock piles? No   |  |  |
| b) use of spray bar, chute, or partial enclosure to mitigate emissions at the drop point to the truck? \(\sigma\) Yes \(\sigma\) No   |  |  |
| b) use of spray bar, chute, of partial enclosure to filtiga   | the emissions at the drop point to the truck? \( \sigma \) Tes \( \sigma \) No |  |
|   |  |  |
|   |  |  |
| PART IV: SPECIAL CONDITIONS AND PROCEDURES  | - Rule 62-210.300(4)(d)4., F.A.C.  |  |
| A. New or Modified Process Equipment  |  |  |
|   |  |  |
| 1. Since the last inspection has there been   |  |  |
| a) installation of any new process equipment?   | □Yes ⊠ No  |  |
| b) alterations to existing process equipment without replacement?  Yes No   |  |  |
| c) replacement of existing equipment substantially different than that noted on the most  |  |  |
| recent notification form?   |  |  |
|   |  |  |
| d) If you answered <u>YES</u> to any of the above, did the owner submit a new and complete notification form and appropriate fee (Rule 62-4.050, FAC) to the appropriate DEP or |  |  |
| local management and appropriate fee (Rule 62-4.0   |  |  |
| local program office?   | Yes  |  |

#### COMMENTS:

No emissions were observed from the two bag houses that serve the three silos. Emmissions were observed coming from the drop point to the truck. These emissions were intermittent ranging from zero to twenty. Both Mr. Beatty and I ran VE observation tests of the drop point during loading of trucks. Mr. Beatty's highest 6-minute average opacity was 4.2%, my highest was 4.8%, both within the compliance range of 5% opacity.

Correspondence from Mr. Beatty, dated July 23, 2007, (attached) reported the causes of the intermittent emissions from the batching, and the corrective actions taken.

Subject: Tavernier

In follow up to our conversation last week.

The problem with the weigh scale at Tavernier was 2-fold.

First: The weigh scale dust collector was not properly attached to the top of the scale and dust was allowed to escape. This has since been corrected and the dust collector is now working properly.

Second: There was an old vent port that was missing a plug. This port is now situated to back up the existing dust collector. It acts as a pop-off in the event that the dust collector malfunctions.

I am planning on checking the performance of these repairs/modifications early next Monday morning. I will call you to let you know how the plant looks. Then maybe later in the week we can meet to do a follow-up VE together.
