**COMMENTS:** Ilka Bundy audited a compliance test that was conducted on 8/12/2009. William Arlington, owner and consultant from Arlington Environmental Services, Inc. was present for the compliance test. Four visible emission audits were conducted by Ilka Bundy. The four points tested were EU001-fly ash loading, EU002-north bin DC, EU003-south bin DC, and EU005-ground-mounted CDC. EU004 is not tested per the application since the unit is enclosed inside a building. All emission points had an observed opacity of zero percent. All loading rates were acceptable. Staff stated the yard is swept weekly and water is used as needed to control yard dust. No new equipment has been installed since last year's inspection. During the inspection, the yard was a little dusty. Vehicular traffic was causing dust clouds on the property. The dust was not leaving the property at the time of the inspection.
