COMMENTS: I met with Ricky Goldman, Operator. I observe units and a batcher baghouse).	red the facility. No changes in equipment were noted (3 silos w/ filter	
The plant was in operation. A truck was being loaded with a batch. Temporary emissions were observed during initial loading, but overall opacity was 5% or less.		
The curtain was mostly intact on three sides, but needed repair, especially on the side that the truck is loaded.		
No major problems were noted. The last compliance test on record was completed on 7/08/2009.
