

NON-METALLIC MINERAL PROCESSING PLANTS

COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2) RE-INSPECTION (FUI)	
AIRS ID#: 7770262 001 DATE: <u>5/27/10</u>	ARRIVE: 1:00 pm DEPART: 2:00 pm
FACILITY NAME: Angelo's Aggregate Materials	LTD
FACILITY LOCATION: 1755 - 20th Avenu	e S.E.
Largo, FL	
RESPONSIBLE OFFICIAL: <u>Neiro De Rubis</u>	PHONE: 727-919-4702
CONTACT NAME: Dominic Iafrate, Jr	PHONE: 727-919-4702
REMITTANCE YEAR: <u>2012</u> EN	TITLEMENT PERIOD:3/25/07/3/25/2012(effective date)(end date)
PART I: INSPECTION COMPLIANCE STATU IN COMPLIANCE IN COMPLIANCE	
PART II: <u>DETERMINATION OF FACILITY T</u> (check ☑ only <u>one</u> box)	<u>YPE/APPLICABILITY</u>
☐ FOR FACILTIES SUBJECT TO: (40 CFR P (If you have checked ☑ this category, answer	
elevator, belt conveyor, bagging operation, stor	able facilities include each crusher, grinding mill, screening operation, bucket age bin, enclosed truck or railcar loading station, crushers & grinding mills at hot i-mettalic minerals embedded in recycled asphalt pavement & subsequent affected e silo or bin.)
☐ <u>FOR FACILITIES NOT SUBJECT TO</u> : (40 (If you have checked ☑ this category, answer	CFR Part 60, Subpart OOO, §60.670(a)(2), (b), (c), and (d)) all questions EXCEPT those with **.)
grinding mills; facilities not subject to subparts sand & gravel plants, & crushed stone plants w/	n underground mines; stand-alone screening operations at plants w/o crushers or F (Portland Cement Plants) or I (Hot Mix Asphalt Facilities) of this part; <u>fixed</u> capacities of 23 megagrams/hr (25 tons/hr) or less; <u>portable</u> sand & gravel plants, agrams/hr (150 tons/hr) or less; common clay plants, and pumice plants less.)

PART III: <u>EMISSION STANDARDS</u> – Chapter 62-210.300(4)(c)5., F.A.C. (check ☑ appropriate box(es))			
Stack Emissions - 40 CFR Part 60, Subpart OOO adopted by reference Chapter 62-204.800, F.A.C.			
**1. Were visible stack emissions tests conducted during this site visit according to EPA Method 9 (40 CFR 60	•		
Appendix A)?	Yes	\boxtimes N	No
**2. Do stack emissions from any crusher, grinding mill, screening operation, bucket elevator, transfer point on			
belt conveyors, bagging operation, storage bin, enclosed truck or railcar loading station or any other			
affected emission point:	_	_	
**a) exceed <u>7</u> % percent opacity?	Yes		No
** b) exceed the particulate matter standard of <u>0.05</u> grams per dry standard cubic meter (g/dscm)?	Yes	N 🛛	No
**3. Do stack emissions from any baghouse that controls emissions from only an individual, enclosed storage		N 1	
bin exceed <u>7</u>% percent opacity?	Yes	M N	0
Visible Emissions - 40 CFR Part 60, Subpart OOO adopted by reference Chapter 62-204.800, F.A.C.			
**1. Were visible emissions tests conducted during this site visit according to EPA Method 9 (40 CFR 60,	_	_	
Appendix A)?	Yes	🖂 N	0
**2. Do visible emissions from any:			
**a) grinding mill, screening operation, bucket elevator, transfer point on belt conveyors, bagging operation	,		
storage bin, enclosed truck or railcar loading station or any other affected emission point exceed $\underline{10}\%$			
percent opacity?**b) crusher without a capture system, exceed <u>15</u> % opacity?			
3. Pursuant to subparagraph 62-296.320(4)(b)1., F.A.C., are visible emissions from any crusher, grinding,	les		0
screening operation, bucket elevator, transfer points on belt conveyors, bagging operation, storage bin,			
enclosed truck or railcar loading station, or any other emission point <u>NOT</u> subject to 40 CFR Part 60,			
	Yes	ΜN	0
<u>Emission Points Enclosed in Buildings</u> - 40 CFR Part 60, Subpart OOO adopted by reference Chapter 62			
**4. Is any crusher, grinding mill, screening operation, bucket elevator, transfer point on belt conveyors, baggin		,	
operation, storage bin, enclosed truck or railcar loading station, or any other affected emission point enclosed			
	Yes	N N	0
**a) If enclosed in a building are the stack emissions discharged from a wet scrubbing control device? (If			
	Yes	🛛 N	0
**b) If the stack emissions from enclosed emission points are not discharged from a wet scrubbing control d			
1) the particulate matter in excess of 0.05 grams per dry standard cubic meter (g/dscm)?	Yes		
2) the opacity greater than <u>7</u> % percent?	Yes		
**c) Do the stack emissions from the baghouse(s) inside of the building(s) exceed 7% percent opacity?	Yes	N	0
**5. Do visible emissions from any:			
**a) grinding mill, screening operation, bucket elevator, transfer point on belt conveyors, bagging operation storage bin, enclosed truck or railcar loading station or any other affected emission point exceed <u>10</u> %	,		
percent opacity?		M N	0
**b) crusher without a capture system, exceed <u>15</u> % opacity?			
Note: this facility does not have an enclosed non-metallic mineral loading area.			0
<u>Wet Screening/Wet Mining Operations</u> :			
**6. Are there any visible emissions discharges at the wet screening operations and subsequent screening			
operations, bucket elevators and belt conveyors that process saturated material in the production line up to the next crusher, grinding mill, or storage bin?		M N	0
**7. Are there any visible emissions discharges at the screening operations, bucket elevators, and belt conveyor			U
in the production line downstream of wet mining operations, where such screening operations, bucket	0		
elevators, and belt conveyors process saturated materials up to the first crusher, grinding mill, or storage b	in		
in the production line?	Yes	🖂 N	0
Note: This facility does not have wet screening or wet mining operations.			

Compliance Demonstration – (Rule 62-210.300(4)(c)5.h., I	
1. Is each affected emission point tested according to the	
part of the annual compliance demonstration? (Rule 6)	
Compliance <u>New Facilities</u> – (Rule 62-210.300(4)(c)5.h., F.	
2. Did this facility demonstrate, according to the visible	emissions and stack emissions standards of
Rule 62-210.300(4)(c)5.e., F.A.C.,:	
a) initial compliance prior to beginning commercial of	
b) renewal compliance within 60 days prior to the and	
	\square No
Compliance Existing Facilities – (Rule 62-210.300(4)(c)5.h	
3. Did this facility demonstrate, according to the visible of	emissions and stack emissions standards of
Rule 62-210.300(4)(c)5.e., F.A.C.,:	
a) compliance within 60 days prior to submitting an a	
b) renewal compliance within 60 days prior to the and	
	$ \qquad \qquad$
	0 CFR 60.675, and 40 CFR Part 60, Appendix A adopted and
ncorporated by reference at Rule 62-204.800, F.A.C.	
4. Were all referenced visible emissions tests conducted	
5. Were all referenced unconfined or fugitive emissions	
6. Were all referenced stack emissions or particulate mat	ter tests conducted using EPA Methods 5 or 17? \Box Yes \Box No
0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc	
-	corporated by reference at Rule 62-204.800, F.A.C.]
 O CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, and/or equipment: 	corporated by reference at Rule 62-204.800, F.A.C.] the following information about the replacement of existing facility
 O CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, and/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag 	the following information about the replacement of existing facility
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou 	the following information about the replacement of existing facility <u>reging Operation, or enclosed truck, or Railcar Loading Station</u> , ur of the existing facility being replaced and the rated
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equipment 	the following information about the replacement of existing facility aging <u>Operation</u> , or <u>enclosed truck</u> , or <u>Railcar Loading Station</u> , or of the existing facility being replaced and the rated
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equivalent in the structure of the structure	the following information about the replacement of existing facility <u>aging Operation, or enclosed truck, or Railcar Loading Station,</u> ar of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and ind Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equivalent in the surface area of the top screen of the ex 	the following information about the replacement of existing facility <u>aging Operation, or enclosed truck, or Railcar Loading Station,</u> ur of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and ind Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equipment: **b) for a Screening Operation, **1) the total surface area of the top screen of the replacement 	the following information about the replacement of existing facility <u>gging Operation, or enclosed truck, or Railcar Loading Station,</u> ur of the existing facility being replaced and the rated uipment? □Yes □ No isting screening operation being replaced and the total
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and ind Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equivalent in the total surface area of the top screen of the replacement **c) for a Conveyor Belt,	the following information about the replacement of existing facility <u>gging Operation, or enclosed truck, or Railcar Loading Station,</u> ur of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and ind Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hor capacity in tons per hour of the replacement equivalent in the total surface area of the top screen of the replacement **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and 	the following information about the replacement of existing facility <u>aging Operation, or enclosed truck, or Railcar Loading Station,</u> ur of the existing facility being replaced and the rated uipment?
 O CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hot capacity in tons per hour of the replacement equivalent in the total surface area of the top screen of the existing a surface area of the top screen of the replacemer **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and **d) for a Storage Bin, 	the following information about the replacement of existing facility aging Operation, or enclosed truck, or Railcar Loading Station, ar of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hot capacity in tons per hour of the replacement equivalent in the total surface area of the top screen of the existing surface area of the top screen of the replacemer **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the existing belt being replaced and 	the following information about the replacement of existing facility <u>reging Operation, or enclosed truck, or Railcar Loading Station,</u> ur of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equipment: **b) for a Screening Operation, **1) the total surface area of the top screen of the replacemer **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the capacity in megagrams or tons of replacement so 	the following information about the replacement of existing facility <u>reging Operation, or enclosed truck, or Railcar Loading Station,</u> ur of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equipment: **b) for a Screening Operation, **1) the total surface area of the top screen of the replacemer **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the capacity in megagrams or tons of the screen of the replacement stee there were no replacements to report. 	the following information about the replacement of existing facility <u>reging Operation, or enclosed truck, or Railcar Loading Station,</u> ur of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equivalent in the total surface area of the top screen of the replacement **c) for a Storage Bin, **1) the rated capacity in megagrams or tons of the capacity in the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the capacity in megagrams or tons of	the following information about the replacement of existing facility aging Operation, or enclosed truck, or Railcar Loading Station, ar of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equivalent in the total surface area of the top screen of the replacement **c) for a Screening Operation, **1) the total surface area of the top screen of the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the cap	the following information about the replacement of existing facility aging Operation, or enclosed truck, or Railcar Loading Station, ar of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and ind Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hor capacity in tons per hour of the replacement equipment: **b) for a Screening Operation, **1) the total surface area of the top screen of the explacement **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the explacement store apacity in megagrams or tons of the explanation of the replacement store apacity in megagrams or tons of the explanation of the replacement store of the initial performance test, did the owner or or in pressure of the gas stream across the scrubber and the stream across the scrubber across the scrubber across the scrubber and the stream across the scrubber across the sc	the following information about the replacement of existing facility aging Operation, or enclosed truck, or Railcar Loading Station, ar of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hot capacity in tons per hour of the replacement equ **b) for a Screening Operation, **1) the total surface area of the top screen of the ex surface area of the top screen of the replacemer **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the ex capacity in megagrams or tons of replacement store port. Performance/Compliance Testing *8. During the initial performance test, did the owner or o in pressure of the gas stream across the scrubber and t 	the following information about the replacement of existing facility aging Operation, or enclosed truck, or Railcar Loading Station, ar of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hou capacity in tons per hour of the replacement equipment: **b) for a Screening Operation, **1) the total surface area of the top screen of the ex surface area of the top screen of the replacemer **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the capacity in megagrams or tons of the screen of the replacement store active in megagrams or tons of the screen of the initial performance test, did the owner or o in pressure of the gas stream across the scrubber and t *9. After the initial performance test of a wet scrubber, di the Administrator of occurrences when the measurement 	the following information about the replacement of existing facility aging Operation, or enclosed truck, or Railcar Loading Station, ar of the existing facility being replaced and the rated uipment?
 O CFR Part 60.670 – 60.676, Subpart OOO, adopted and ince Facility and/or Equipment Replacement **7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hot capacity in tons per hour of the replacement equipment: **b) for a Screening Operation, **1) the total surface area of the top screen of the existing capacity in the existing belt being replaced and **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the capacity in megagrams or tons of the replacement stee: there were no replacements to report. Performance/Compliance Testing *8. During the initial performance test, did the owner or o in pressure of the gas stream across the scrubber and t **9. After the initial performance test of a wet scrubber, di the Administrator of occurrences when the measurement flow rate differ by more than ±30 percent from the avere flow rate differ by more than ±30 percent from the avere flow rate differ by more than ±30 percent from the avere flow rate differ by more than ±30 percent from the avere flow rate differ by more than ±30 percent from the avere flow rate differ by more than ±30 percent from the avere flow rate differ by more than ±30 percent from the avere flow rate differ by more than ±30 percent fl	the following information about the replacement of existing facility aging Operation, or enclosed truck, or Railcar Loading Station, ar of the existing facility being replaced and the rated uipment?
 0 CFR Part 60.670 – 60.676, Subpart OOO, adopted and inc Facility and/or Equipment Replacement *7. Did the owner or operator submit to the Administrator, nd/or equipment: **a) for a Crusher, Grinding Mill, Bucket Elevator, Bag **1) the rated capacity in megagrams or tons per hot capacity in tons per hour of the replacement equ **b) for a Screening Operation, **1) the total surface area of the top screen of the ex surface area of the top screen of the replacemer **c) for a Conveyor Belt, **1) the width of the existing belt being replaced and **d) for a Storage Bin, **1) the rated capacity in megagrams or tons of the capacity in megagrams or tons of the capacity in megagrams or tons of the screen of the existing belt being replaced and **8. During the initial performance test, did the owner or o in pressure of the gas stream across the scrubber and t *9. After the initial performance test of a wet scrubber, di the Administrator of occurrences when the measurement flow rate differ by more than ±30 percent from the aver 	the following information about the replacement of existing facility aging Operation, or enclosed truck, or Railcar Loading Station, ar of the existing facility being replaced and the rated uipment? Yes No isting screening operation being replaced and the total at screening operation? Yes No d the width of the replacement conveyor belt? Yes No existing storage bin being replaced and the rated storage bins? Yes No perator record the measurements of both the change he scrubbing liquid flow rate? Yes No d the owner or operator submit semiannual reports to ents of the scrubber pressure loss (or gain) and liquid eraged determined during the most recent performance

PART IV: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-210.300, F.A.C. (*Continued*) (check ☑ appropriate box(es)

**10. Did the owner or operator of the facility submit written reports of the results of all performance tests conducted to demonstrate compliance with the particulate matter standards (40 CFR Part 60.672), opacity (using EPA Method 9 to demonstrate compliance with 40 CFR Part 60.672(b), (c), and (f)), and emission observations of transfer points enclosed in buildings (using EPA Method 22 to demonstrate compliance with 40 CFR Part 60.672(e))?	ith ⊠Yes □ No
Process Changes	
**11. Does this facility have a screening operation, bucket elevator, and/or a belt conveyor system? (If your	
answer to this question is <u>YES</u> , then answer <u>either</u> a)1) or a)2) below.)	Xes No
**a)Did this screening operation, bucket elevator, and/or belt conveyor system:	
**1) originally process saturated material and switch to unsaturated material? (<i>Note: The unsaturated</i>	
material handling processes would now be subject to the <u>10% opacity limit</u> in 40 CFR 60.672(b)	
and the emission test requirements of 40 CFR 60.11 and Subpart OOO.)	□Yes 🛛 No
**2) originally process unsaturated material and switch to saturated material? (Note: The saturated	
material handling processes would now be subject to the <u>no visible emission limit</u> in 40 CFR 60.672	(h).)
(If answer to 1) or 2) above is <u>YES</u> then proceed to question b) below.)	Yes No
**b) Did the owner or operator submit a report of the process change within thirty (30) days following the	
change?	Yes No
Notification Requirements	
**12. Was notification of the actual date of startup for each affected or combination of affected facilities	
submitted to the Administrator and postmarked within 15 days after such date?	🛛 Yes 🗌 No
**a) Did the notification include a description of each affected facility, equipment manufacturer, and serial	
number of the equipment, if available?	Yes No
**b) For portable aggregate processing plants, did the notification of actual date of initial start up also	
include both the home office and the current address or location of the portable plant?	🗌 Yes 🗌 No

PART V: <u>OPERATING REQUIREMENTS/CONTROL TECHNOLOGY</u> – Rule 62-210.300, F.A.C.

(check ☑ appropriate box(es))

 Is this facility a: 1) relocatable ; 2) stationary ; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? (<i>Please check Zonly one box above.</i>) (<u>NOTE:</u> If you have checked the box for relocatable go to questions 1.a) & 1.b). If you have checked the box for stationary go to question 1.c). If you have checked box #3, both, stationary and relocatable then answer all
relocatable and stationary questions 1.a), 1.b), & 1.c) below, respectively.)
a) If this is a relocatable facility was the Department notified by phone prior to this relocation, and was a
Facility Relocation Notification form submitted within 1 business day following the relocation? 🗌 Yes 🗌 No
b) If this is a relocatable facility , is it located at a mine and/or quarry, and processing only material from onsite
deposits? (If your answer to this question is <u>NO</u> , please proceed to question 1) below.) [Yes No
1) Does the owner or operator of this relocatable facility have a water suppression system with spray
bars located at the feeder(s), the entrance, and the exit of the crusher(s), the classifier screens and the
conveyor drop points? 🖾 Yes 🗌 No
c) If this is a stationary facility, does the owner or operator of this stationary facility have a water
suppression system with spray bars located at the feeder(s), the entrance, and the exit of the crusher(s),
the classifier screens and the conveyor drop points?
Note: This facility is semi-stationary; it's permitted as relocatable, but remains at the same location.

PART V: <u>OPERATING REQUIREMENTS/CONTROL TECHNOLOGY</u> – Rule 62-210.300, F.A.C. (*Continued*) (check ☑ appropriate box(es))

adopted by reference Chapter 62-204.800, F.A.C.) (If your answer to this question is YES, then proceed to questions 2.a) and 2.b), below.) □Yes □ No **a) Does the wet scrubber have continuous monitoring systems (CMS) for: **1) the measurement of the pressure loss of the gas stream through the scrubber?□Yes □ No No **2) the measurement of the scrubbing liquid flow rate to the wet scrubber?□Yes □ No □Yes □ No **2) the measurement of the scrubbing liquid flow rate to the wet scrubber?□Yes □ No □Yes □ No **1) ±250 pascals ±1 inch water guage pressure for measuring pressure losses of the gas stream?□Yes □ No □Yes □ No **2) ±5 percent of design scrubbing liquid flow rate?□Yes □ No □Yes □ No **2) ±5 percent of design scrubbing liquid flow rate?□Yes □ No □Yes □ No 3. Is this is a stationary nonmetallic mineral processing plant, with a stationary concrete batching plant using an □rdividual concrete batching plant air general permit at the same location? (If your answer to this question is <u>YES</u> , then proceed to questions 3.a), thru 3.d), below. If <u>NO</u> , proceed to question #4.)	
 **a) Does the wet scrubber have continuous monitoring systems (CMS) for: **1) the measurement of the pressure loss of the gas stream through the scrubber?	
 **1) the measurement of the pressure loss of the gas stream through the scrubber?	
 **2) the measurement of the scrubbing liquid flow rate to the wet scrubber? **b) Has each CMS been certified by the manufacturer and calibrated annually in accordance with the manufacturer's instructions and to the tolerances below? **1) ±250 pascals ±1 inch water guage pressure for measuring pressure losses of the gas stream? **2) ±5 percent of design scrubbing liquid flow rate? 3. Is this is a stationary nonmetallic mineral processing plant, with a stationary concrete batching plant using an individual concrete batching plant air general permit at the same location? (<i>If your answer to this question is <u>YES</u>, then proceed to questions 3.a), thru 3.d),) below. If <u>NO</u>, proceed to question #4.)</i> a) Is there more than one nonmetallic mineral processing plant in operation at this location? (Jess No b) If there is more than one nonmetallic mineral processing plant at this location, do they all operate under a single nonmetallic mineral processing plant air general permit? b) If there any additional nonexempt units located at this facility? c) Are there any additional nonexempt units located at this facility?	
 **b) Has each CMS been certified by the manufacturer and calibrated annually in accordance with the manufacturer's instructions and to the tolerances below? **1) ±250 pascals ±1 inch water guage pressure for measuring pressure losses of the gas stream? **2) ±5 percent of design scrubbing liquid flow rate? 3. Is this is a stationary nonmetallic mineral processing plant, with a stationary concrete batching plant using an individual concrete batching plant air general permit at the same location? (<i>If your answer to this question is <u>YES</u>, then proceed to questions 3.a), thru 3.d</i>),) below. If <u>NO</u>, proceed to question #4.) b) If there is more than one nonmetallic mineral processing plant at this location, do they all operate under a single nonmetallic mineral processing plant air general permit? b) If there any additional nonexempt units located at this facility?	
manufacturer's instructions and to the tolerances below? □Yes □No **1) ±250 pascals ±1 inch water guage pressure for measuring pressure losses of the gas stream? □Yes □No **2) ±5 percent of design scrubbing liquid flow rate? □Yes □No 3. Is this is a stationary nonmetallic mineral processing plant, with a stationary concrete batching plant using an individual concrete batching plant air general permit at the same location? (<i>If your answer to this question is <u>YES</u>, then proceed to questions 3.a), thru 3.d),) below. If <u>NO</u>, proceed to question #4.) □Yes □No a) Is there more than one nonmetallic mineral processing plant in operation at this location? □Yes □No b) If there is more than one nonmetallic mineral processing plant at general permit? □Yes □No c) Are there any additional nonexempt units located at this facility?</i>	
**1) ±250 pascals ±1 inch water guage pressure for measuring pressure losses of the gas stream? □Yes □ No **2) ±5 percent of design scrubbing liquid flow rate? □Yes □ No 3. Is this is a stationary nonmetallic mineral processing plant, with a stationary concrete batching plant using an individual concrete batching plant air general permit at the same location?  is <u>YES</u>, then proceed to questions 3.a), thru 3.d),) below. If <u>NO</u>, proceed to question #4.) a) Is there more than one nonmetallic mineral processing plant in operation at this location? b) If there is more than one nonmetallic mineral processing plant at this location, do they all operate under a single nonmetallic mineral processing plant air general permit? c) Are there any additional nonexempt units located at this facility? d) Are there any Title V sources located at this facility? 	
 a) Is there more than one nonmetallic mineral processing plant in operation at this location? b) If there is more than one nonmetallic mineral processing plant at this location, do they all operate under a single nonmetallic mineral processing plant air general permit? c) Are there any additional nonexempt units located at this facility? d) Are there any Title V sources located at this facility?	
 b) If there is more than one nonmetallic mineral processing plant at this location, do they all operate under a single nonmetallic mineral processing plant air general permit?	
a single nonmetallic mineral processing plant air general permit? C) Are there any additional nonexempt units located at this facility? d) Are there any Title V sources located at this facility? Yes No Yes No Yes No	
 c) Are there any additional nonexempt units located at this facility? d) Are there any Title V sources located at this facility? Yes No Yes Ves No 	
 c) Are there any additional nonexempt units located at this facility? d) Are there any Title V sources located at this facility? Yes No Yes Ves No 	
4. Is this is a stationary nonmetallic mineral processing plant, with one or more relocatable concrete	
batching plants using individual air general permits at the same location? (If your answer to this	
question is <u>YES</u> , then proceed to questions 4.a), thru 4.b) below. If <u>NO</u> , then proceed to question 5.) \Box Yes \boxtimes No	
a) Are there any additional nonexempt units located at this facility?	
b) Are there any Title V sources located at this facility?	
5. Does the owner or operator of this facility operate multiple relocatable nonmetallic mineral processing	
plants using individual nonmetallic mineral processing plant air general permits at this location? 🗌 Yes 🖾 No)
a) Are there any additional nonexempt units located at this facility?	
b) Is the total combined annual facility-wide fuel oil usage of all plants less than 240,000 gallons per	
calendar year? Note: crusher is operated by electric motor	
c) Is the quantity of material processed less than ten million tons per calendar year?Note: Facility	
processes approximately 20,000 – 30, 000 tons per year at this time Xes D Yes No	
d) Is the fuel oil sulfur content 0.5% by weight or less?- Note: crusher is operated by electric motor Yes No	
6. Does the owner/operator of the concrete batching plant maintain a log book or books to account for:	
a) fuel consumption on a monthly basis?	
b) material processed on a monthly basis?	
c) the sulfur content of the fuel being burned (Fuel supplier certifications)? Yes Yes No	
 7. Is this relocatable nonmetallic mineral processing plant used to perform a <u>routine function</u> of a facility (<i>not</i> 	
<i>a Title V source</i>) subject to regular air permitting, such as crushing recycled asphalt (rap) at an asphalt	
plant? [Yes X No	
a) If <u>YES</u> , does the regularly permitted facility air construction or air operation permit(s) provide for the	
operation of the nonmetallic mineral processing plant as an emission unit?	
8. Is this relocatable nonmetallic mineral processing plant used to perform a <u>non-routine activity</u> , such as	
destruction of a building, at a regularly permitted facility (<i>not a Title V source</i>)? \Box Yes \boxtimes No	
a) If <u>YES</u> , does it operate under the authority of its air general permit? \Box Yes \Box No	
a_j in <u>TLD</u> , does it operate under the authority of its an general permit.	

PART VI: REASONABLE PRECAUTIONS/EMISSION CONTROL MEASURES & TECHNOLOGY - Rule 62-

210.300(4)(c)5.d.(i) and (ii), F.A.C. (check ☑ appropriate box(es))

Unconfined Emissions – (Rule 62-296.320(4)(c), F.A.C.)

1.	Does the owner /operator of the nonmetallic mineral processing plant take reasonable precautions to control unconfined
	emissions by:

a)	use of a water suppression system with spray bars located at the feeder(s), the entrance and exit of the		
	crusher(s), the classifier screens, and the conveyor drop points?	Yes 🗌	No
b)	management of roads, parking areas, stock piles, and yards, which shall include one or more of the fo	llowing:	
	1) paving and maintenance of roads, parking areas, stock piles, and yards?	Yes 🗌	No
	2) application of water or environmentally safe dust-suppressant chemicals when necessary to contro	1	
	emissions?	Yes 🗌	No
3)	removal of particulate matter from roads and other paved areas under control of the owner/operator to	1	
	re-entrainment, and from building or work areas to reduce airborne particulate matter?	🛛 Yes 🗌	No
	4) reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of		
	particulate matter from stock piles?	Yes 🗌	No
	5) landscaping and/or the planting of vegetation?	🗌 Yes 🖂	No
	6) the use of hoods, fans, filters and similar equipment to contain, capture and/or vent particulate		
	matter?	🗌 Yes 🖂	No
7)	the enclosure or covering of conveyor systems?	\Box Yes \boxtimes	No

7)	the enclosure or covering of	conveyor systems?]

Ι	M N	Ν	
N	C	C	B. Specific Conditions feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points. (ii) Unconfined emissions that might be generated by vehicular traffic or wind shall be controlled by applying water (by water trucks equipped with spray bars) or effective dust suppressant(s) on a regular basis to all stockpiles, roadways and work-yards where this nonmetallic mineral processing plant is located; [62-210.300(4)(c)5.d., F.A.C.] Comments: The facility uses a water truck which runs 3 - 4 times a day to control fugitive emissions (see copy of log) as well as a sweeper which runs a few times a day to clean the yard and entry/exit into the facility. See "Other Comments" at end for further info.
X			Stack emissions from any crusher, grinding mill, screening operation, bucket elevator, transfer point on belt conveyors, bagging operation, storage bin, enclosed truck or railcar loading station, or any other affected emission point subject to 40 CFR Part 60, Subpart OOO, adopted and incorporated by reference at Rule 62-204.800, F.A.C., shall not contain particulate matter in excess of 0.05 grams per dry standard cubic meter (g/dscm) nor exceed 7% opacity, unless the stack emissions are discharged from a wet scrubbing control device. [62-210.300(4)(c)5.e.(i), F.A.C.]
\boxtimes			Stack emissions from any baghouse that controls emissions from only an individual, enclosed storage bin subject to 40 CFR Part 60, Subpart OOO, adopted and incorporated by reference at Rule 62-204.800, F.A.C., shall not exceed 7% opacity. [62-210.300(4)(c)5.e.(ii), F.A.C.] Comments: The facility adoes and operate an enclosed storage bin with a baghouse. Note: There are no stacks at this facility.
			 Visible emissions from any grinding mill, screening operation, bucket elevator, transfer point on belt conveyors, bagging operation, storage bin, enclosed truck or railcar loading station, or any other affected emission point subject to 40 CFR Part 60, Subpart OOO, adopted and incorporated by reference at Rule 62-204.800, F.A.C., shall not exceed 10% opacity; and visible emissions from any crusher without a capture system subject to 40 CFR Part 60, Subpart OOO, shall not exceed 15% opacity. [62-210.300(4)(c)5.e.(iii), F.A.C.] <i>Comments:</i> An AQD VE test was performed during this site visit; Yes □, or No □, or NA □ The results of the various points were: Note: The equipment was not in operation at the time of inspection. It operates approximately once a month or less due to economic conditions.
			Truck dumping of nonmetallic minerals into any screening operation, feed hopper, or crusher subject to 40 CFR Part 60, Subpart OOO, adopted and incorporated by reference at Rule 62-204.800, F.A.C., is exempt from the emissions standards of sub-subparagraph 62-210.300(4)(c)5.e., F.A.C.; [62-210.300(4)(c)5.e.(vi), F.A.C.] <i>Comments:</i>
			The owner or operator shall ensure that wet screening operations and subsequent screening operations, bucket elevators, and belt conveyors that process saturated material in the production line up to the next crusher, grinding mill or storage bin and are subject to 40 CFR Part 60, Subpart OOO, adopted and incorporated by reference at Rule 62-204.800, F.A.C., do not discharge any visible emissions. The owner or operator shall also ensure that screening operations, bucket elevators, and belt conveyors in the production line downstream of wet mining operations, where such screening operations, bucket elevators, and belt conveyors process saturated materials up to the first crusher, grinding mill, or storage bin in the production line and are subject to 40 CFR Part 60, Subpart OOO, adopted and incorporated by

I N	M N C	S N C	B. Specific Conditions
			reference at Rule 62-204.800, F.A.C., do not discharge any visible emissions; [62-210.300(4)(c)5.f., F.A.C.]
			<i>Comments:</i> There are no wet screening or wet mining operations at this facility.
			 The owner or operator of a nonmetallic mineral processing plant subject to 40 CFR Part 60, Subpart OOO, adopted and incorporated by reference at Rule 62-204.800, F.A.C., and using a wet scrubber to control emissions shall comply with the monitoring requirements of 40 CFR 60.674, adopted and incorporated by reference at Rule 62-204.800, F.A.C.; [62-210.300(4)(c)5.g., F.A.C.] §60.674 Monitoring of operations. The owner or operator of any affected facility subject to the provisions of this subpart which uses a wet scrubber to control emissions shall install, calibrate, maintain and operate the following monitoring devices: (a) A device for the continuous measurement of the pressure loss of the gas stream through the scrubber. The monitoring device must be certified by the manufacturer to be accurate within ±250 pascals ±1 inch water gauge pressure and must be calibrated on an annual basis in accordance with manufacturer's instructions. (b) A device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber. The monitoring device must be certified by the manufacturer to be accurate within ±250 pascals ±1 inch water gauge pressure and must be calibrated on an annual basis in accordance with manufacturer's instructions. (b) A device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber. The monitoring device must be certified by the manufacturer to be accurate within ±5 percent of design scrubbing liquid flow rate and must be calibrated on an annual basis in accordance with manufacturer's instructions. (comments: The facility □ does □ does not operate a wet scrubber.
			The owner or operator of any existing facility shall demonstrate compliance with the emission standards of sub- subparagraph 62-210.300(4)(c)5.e., F.A.C., within 60 days prior to submitting an air general permit notification form and shall demonstrate renewal compliance within 60 days prior to the anniversary of the initial air general permit notification form submittal date. [62-210.300(4)(c)5.h., F.A.C.] Comments: The test for renewal should be completed within 60 days prior to 3/25/2012
			 The owner or operator shall meet all applicable reporting and recordkeeping requirements of Chapter 62-297, F.A.C. and 40 CFR 60.676, adopted and incorporated by reference at Rule 62-204.800, F.A.C.; [62-210.300(4)(c)5.i., F.A.C.] §60.676 Reporting and recordkeeping. (a) Each owner or operator seeking to comply with §60.670(d) shall submit to the Administrator the following information about the existing facility being replaced and the replacement piece of equipment. (1) For a crusher, grinding mill, bucket elevator, bagging operation, or enclosed truck or railcar loading station: (i) The rated capacity in megagrams or tons per hour of the existing facility being replaced and (ii) The rated capacity in tons per hour of the replacement equipment. (2) For a screening operation: (i) The total surface area of the top screen of the existing screening operation being replaced and (ii) The total surface area of the top screen of the replacement screening operation. (3) For a conveyor belt: (i) The width of the existing belt being replaced and (ii) The width of the existing belt being replaced and (ii) The width of the existing sort tons of the existing storage bin being replaced and (ii) The rated capacity in megagrams or tons of the gas stream across the scrubber and the scrubbing liquid flow rate. (c) During the initial performance test of a wet scrubber, and daily thereafter, the owner or operator shall record the Administrator of occurrences when the measurements of the scrubber pressure loss (or gain) and liquid flow rate. (d) After the initial performance test of a wet scrubber, the owner or operator shall submit semiannual reports to the Administrator of occurrences when the measurements of the scrubber pressure loss (or gain) and liquid flow rate differ by more than ±30 percent from the averaged determined during the most re

		6	Noninetanic Mineral Processing Plants, Subpart 000– General Permits
Ι	M N	S N	
N	C	C	B. Specific Conditions
N		C	 B. Specific Conditions opacity observations made using Method 9 to demonstrate compliance with § 60.672(b), (c), and (f), and reports of observations using Method 22 to demonstrate compliance with § 60.672(c). (g) The owner or operator of any screening operation, bucket elevator, or belt conveyor that processes saturated material and is subject to \$60.672(b) and subsequently processes unsaturated materials, shall submit a report of this change within 30 days following such change. This screening operation, bucket elevator, or belt conveyor is then subject to the 10 percent opacity limit in \$60.672(b) and the emission test requirements of \$ 60.11 and this subpart. Likewise a screening operation, bucket elevator, or belt conveyor that processes unsaturated material but subsequently processes saturated material shall submit a report of this change within 30 days following such change. This screening operation, bucket elevator, or belt conveyor is then subject to the no visible emission limit in \$60.672(b). (h) The subpart A requirement under \$60.7(a)(2) for notification of the anticipated date of initial startup of an affected facility shall be waived for owners or operators of affected facilities regulated under this subpart. (i) A notification of the actual date of initial startup of each affected facility shall be submitted to the Administrator. (1) For a combination of affected facilities in a production line that begin actual initial startup on the same day, a single notification of startup may be submitted by the owner or operator to the Administrator. The notification shall be postmarked within 15 days after such date and shall include a description of each affected facility, equipment manufacturer, and serial number of the equipment, if available. (2) For portable aggregate processing plants, the notification of the actual date of initial startup shall include both the home office and the current address or location of the portable plant.
			There were no equipment replacements to report and the factility does not use a wet schubber. The owner or operator of a stationary nonmetallic mineral processing plant using an air general permit may operate a stationary concrete batching plant using an air general permit at the same location provided all nonmetallic mineral processing plant units operate under a single nonmetallic mineral processing plant air general permit, all concrete batching plant units operate under a single concrete batching plant air general permit, and the resultant facility contains no additional nonexempt units and would not be a Title V source; [62-210.300(4)(c)5.j., F.A.C.] Comments: The crushing operation is located \boxtimes independently or \square with a stationary concrete batch plant. The operations \square are \boxtimes are not considered a Title V source. (See below)
			The owner or operator of a stationary nonmetallic mineral processing plant using an air general permit may operate, or allow the operation of, one or more relocatable concrete batching plants using individual air general permits at the same location as the nonmetallic mineral processing plant provided the resultant facility contains no additional nonexempt units and would not be a Title V source; [62-210.300(4)(c)5.k., F.A.C.] Comments: The crushing operation is located \boxtimes independently or \square with relocatable concrete batch plant(s). The operations \square are \boxtimes are not considered a Title V source. (See below)
			The owner or operator of multiple relocatable nonmetallic mineral processing plants using individual nonmetallic mineral processing plant air general permits may operate more than one such plant at the same location provided the resultant facility contains no additional nonexempt units, the total combined annual facility-wide fuel oil usage of all plants is less than 240,000 gallons per calendar year, the material processed is less than 10 million tons per calendar year, and the fuel oil sulfur content does not exceed 0.5%, by weight. The owner or operator of the nonmetallic mineral processing plants shall maintain a log book to account for fuel consumption and material processed on a monthly basis. Fuel supplier certifications shall be maintained to account for the sulfur content of the fuel being burned; and [62-210.300(4)(c)5.1., F.A.C.]

			If a relocatable nonmetallic mineral processing plant is used to perform a routine function of a facility subject to regular air permitting, such as crushing recycled asphalt (rap) at an asphalt plant, it shall not operate under the authority of an air general permit. In such case, the regularly permitted facility air construction or air operation permit(s) must provide for operation of the nonmetallic mineral processing plant as an emission unit. If a relocatable nonmetallic mineral processing plant is used at a regularly permitted facility for a non-routine activity, such as destruction of a building, it may do so under the authority of its air general permit. In either case, the resultant facility shall not be a Title V source. [62-210.300(4)(c)5.m., F.A.C.]
I N	M N C	S N C	C. Selected General Conditions and Procedures
			Administrative Corrections. Within 30 days of any changes requiring corrections to information contained in the notification form, the owner or operator shall notify the Department in writing. Such changes shall include: a. Any change in the name of the authorized representative or facility address or phone number; or b. Any other similar minor administrative change at the facility or emissions unit. [62-210.300(4)(d)3., F.A.C.]
			There are no administrative changes.
			Equipment Changes. In case of the installation of new process equipment, alteration of existing process equipment without replacement, or the replacement of existing process equipment with equipment substantially different than that noted on the most recent notification form, the owner or operator shall submit a new and complete general permit notification form with the appropriate fee pursuant to Rule 62-4.050, F.A.C., to the appropriate Department of Environmental Protection district office or local air pollution control program office to which the Department has delegated its permitting authority. [62-210.300(4)(d)3., F.A.C.]
			<i>Comments:</i> There are no equipment changes.
			 If, for any reason, the owner or operator of any facility operating under an air general permit pursuant to Rule 62-210.300(4)(a), F.A.C., does not comply with or will be unable to comply with any condition or limitation of the permit, the permittee shall immediately provide the Department with the following information: A description of and cause of noncompliance; and The period of noncompliance, including dates and times; or, if not corrected, the anticipated time the noncompliance is expected to continue, and steps being taken to reduce, eliminate, and prevent recurrence of the noncompliance. The permittee shall be responsible for any and all damages which may result.
			<i>Comments:</i> There are no periods of non-compliance.
			 Valid Permit Throughout the term of the general permit: a. The facility operates no emissions units other than a unit described in an air general permit and emissions units which are exempt from permitting pursuant to the criteria of Rule 62-210.300(3)(a) or (b), F.A.C.; b. The facility is not a Title V source as defined in Rule 62-210.200, F.A.C. [62-210.300(4)(c), F.A.C.
			Comments:

	M	S				
Ι	Ν	Ν				
Ν	С	С	C. Selected General Conditions and Procedures			
			The permit is valid.			
			A permittee's use of a general permit is limited to five years. No later than 30 days prior to the fifth anniversary of the filing of intent to use the general permit, the owner or operator shall submit a new notice of intent which shall contain all current information regarding the facility or emissions unit. Eligibility to use the general permit is not transferable and does not follow a change in ownership of the facility or emissions unit. Prior to any sale, other change of ownership, or permanent shutdown of the facility, the owner or operator is encouraged to notify the Department of the pending action. The owner shall remain liable for corrective actions that may be required as a result of any violations occurring in the time after the sale or legal transfer of the facility or emissions unit, but before a new owner is entitled to use an air general permit. [General Conditions - 62-210.300(4)(e)1., F.A.C.] Comments : The permit expires on 3/25/2012. A new notification form is required to be submitted no later than 2/24/2012.			
			No person shall circumvent any air pollution control device or allow the emission of air pollutants without the proper operation of all applicable air pollution control devices. [62-210.300(4)(e)12., F.A.C.]			
			This facility uses a water suppression system for dust control.

Other Comments: I informed Dominic Iafrate that the facility appeared to be in compliance at this time. I encouraged him to keep up with watering and sweeping the facility grounds. I did not observe any fugitive emissions during my visit. The facility grounds (as well as the road from Cemex to Angelo's) appeared slightly damp upon my arrival and the water truck made a pass around the facility during my visit. I further noted the entry and exit to the facility from 20 th Ave SE had limited trackout and urged Dominic to keep the area clean. He stated they do their best and will continue to water the entry/exit as well as the road up to Cemex. Dominic asked for a copy of the inspection report and I told him I would email a copy upon completion. Inspector(s) : Shannon Ransom, Pinellas County, Air Quality Division
