**COMMENTS:** OCEPD personnel, Bill Rhodes and Damon Taylor, arrived at the facility at approximately 12:45 PM to audit a VE test on the central dust collector (EU-001). Lori Sanville, the consultant, representing Vulcan Materials Company, was also present, as well as Mr. Antonio Pietri, Plant Manager with Florida Rock Industries, Inc. The central dust collector at this facility controls the emissions for the two silos (cement & slag), as well as the batching operation. At the time of the test, batching was not taking place due to economic conditions. The truck was already present at the facility prior to OCEPD arrival, containing cement to be offloaded. Damon Taylor, with OCEPD, audited the VE. A 30-minute VE was performed with 0% opacity observed. As was noted earlier in the report, batching was not taking place. The truck pumping rate was approximately 10-12 psi, resulting in a loading rate of 41.6 TPH, which is acceptable. No dust was observed leaving the property.
