# PART III: <u>OPERATING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.401, F.A.C. (check ☑ appropriate box(es))

1. Is there Continuous Emissions Monitoring System (CEMS) equipment installed on each unit to record	
primary and secondary chambers where there is a 1.0 second gas residence time in the secondary chamber c	
accordance with the manufacturer's instructions?	
a) Do temperature probes seem to be properly placed?	Yes 🗌 No
b) Are the following records kept on file, available for inspection for at least two years following the re-	cording of such
measurements, maintenance, reports and records?	
1) All measurements (including CEMS)	🛛 Yes 🗌 No
2) Monitoring device	🛛 Yes 🗌 No
3) Performance Testing Measurements	🛛 Yes 🗌 No
4) CEMS Performance Evaluation	Yes 🗌 No
5) All CEMS or monitoring device calibration checks	Yes 🗍 No
6) Adjustments	Yes 🗍 No
7) Preventive maintenance performed on systems/devices	Yes 🗍 No
8) Corrective maintenance performed on systems/devices	Yes No
2. Was this crematory unit constructed: (check only one 🗹 box)	
a) BEFORE August 30, 1989? (If this box checked, continue on to #3 and skip #4)	
b) $\square$ ON or AFTER August 30, 1989? (If this box checked, skip #3 and continue on to #4)	
0/1 $0/1$ of $111$ $1111$ $110$ $100$ $0000000000000$	
3. If constructed <b>BEFORE</b> August 30, 1989 is the:	
a) secondary chamber combustion zone providing at least a 1.0 second gas residence time @ 1600°F?	Yes No
b) actual operating temperature of the secondary chamber combustion zone no less than 1400°F	
throughout the combustion process in the primary chamber?	Yes No
c) cremation in the primary chamber begun after the secondary chamber combustion zone temperature	
is equal to or greater than 1400°F?	Yes No
d) required monitoring equipment installed and operational, and providing continuous monitoring to	
record the temperature at the point or beyond where 1.0 second gas residence time is obtained in the	
secondary chamber combustion zone according to the manufacturer's instructions?	∐Yes ∐ No
4. If constructed <b>ON</b> or <b>AFTER</b> August 30, 1989 is the:	
a) volume in the secondary combustion zone sufficient to provide at least a 1.0 second gas residence tin	ne
@ 1800 <sup>°</sup> F?	🛛 Yes 🗌 No
b) the actual operating temperature of the secondary chamber combustion zone no less than 1600°F	
throughout the combustion process in the primary chamber?	🛛 Yes 🗌 No
c) secondary chamber combustion zone temperature equal to or greater than <b>1600°F</b> before the cremative	on
process begins in the primary chamber?	Xes 🗌 No
5. Are appropriate cremation containers containing no more than 0.5 % (percent) by weight chlorinated	
plastics used during the cremation of dead human bodies?	🛛 Yes 🗌 No
a) If the answer to question 4 above is YES, is certifying documentation from the manufacturer that the	
are composed of 0.5% or less by weight chlorinated plastics kept on file at the site for the duration of	f
their use and for at least two years after their use?	Yes 🗌 No
b) Are there any other materials, including biomedical wastes (Rule 62-210.200, FAC) incinerated at	
this location?	∏Yes ⊠ No
6. Have all crematory operators been trained and certified by a Department-approved training program?	
a) Are copies of the training certificates for all crematory operators kept on file at the facility for the du	
of the operator's employment & for an additional two years after termination of employment?	🖾 Yes 🗌 No

### PART IV: <u>SPECIAL CONDITIONS AND PROCEDURES</u> – Rule 62-296.401, F.A.C.

A. <u>New or Modified Process Equipment</u>		
1. Since the last inspection has there been		
a) installation of any new process equipment?	Yes	No
b) alterations to existing process equipment without replacement?	Yes	No
c) replacement of existing equipment substantially different than that noted on the most recent notification form?	Yes	No
d) If you answered $\underline{YES}$ to any of the above, did the owner submit a new and complete		
notification form and appropriate fee (Rule 62-4.050, F.A.C.) to the appropriate DEP or		
local program office?	<b>Yes</b>	No
2. If a crematory unit has been modified to the extent that a Department air construction permit was required, have all operators been retrained to operate the modified unit?	Yes	No
<ul><li>3. In the case of new or modified equipment, where a Department air construction permit was required, has the owner submitted copies of all operator training certificates?</li></ul>	□Yes □Yes	□No □No

2008

Inspector's Signature

Approximate Date of Next Inspection

**COMMENTS:** Spoke with Scott Conner about new rules. Went over new rules explaining maintenance schedules and how the new January 10, 2007 rule change addresses the operation of crematories according to manufacturer's specifications. Left him a copy of the new rules. Highlighted areas of rules we went over. Left examples of preventive schedules.

#### OPERATING AT TIME OF INSPECTION EU 001 1777 F EU 002 1750 F

Explained that a complete file of all temperature measurements; all continuous monitoring system, monitoring device, and performance testing measurements; all continuous monitoring system performance evaluations; all continuous monitoring system or monitoring device calibration checks; and all adjustments, preventive maintenance, and corrective maintenance performed on these systems or devices, shall be recorded in a permanent legible form available for inspection. Continuous temperature monitoring documentation shall include operator name, operator indication of when cremation in the primary chamber was begun, date, time, and temperature markings. Pollutant monitoring system documentation shall include indication of when the opacity measurement system was cleaned and checked for proper operation in accordance with the manufacturer's recommended maintenance schedule. The file shall be retained for at least two (2) years following the recording of such measurements, maintenance, reports, and records.

Viewed Records from March 1, 2007 to June 6, 2007

Explained allowed Materials. Human crematory units shall cremate only human or fetal remains with appropriate containers. The remains may be clothed. The containers shall contain no more than 0.5percent by weight chlorinated plastics as demonstrated by the manufacturer's data sheet. If containers are incinerated, documentation from the manufacturers certifying that they are composed of 0.5 percent or less by weight chlorinated plastics shall be kept on-file at the site for the duration of their use and for at least two (2) years after their use. No other material, including biomedical waste shall be incinerated.
