COMMENTS: On December 27, 2013 I visited this facility to conduct the annual compliance inspection. On site I met David Garcia, the plant manager of the facility. Facility consists of three cement silos and one slag silo. West silo was loaded with cement during the time of my inspection. Facility produces approximately 300 yards of concrete on the average per day. Sprinklers are on as needed during the loading precess. No fugitive emissions were observed during my visit.
