COMMENTS: I was met by Mr. Mike Bedwell the plant manager who provided me with copies of requested records and who escorted me on my inspection of the facility. The plant was not in operation at the time of this inspection. Records indicate that weekly maintenance is performed on the baghouse. I did not observe any open container of VOC's or other organic solvents. The most recent VE testing was performed on July 3, 2008 by H.S. & E. Resources, Inc., on the cement and fly ash baghouse as well as on the truck loading operations. The reported opacity was 0%.

This plant presently only operates on an intermittent basis. It last operated for two days in December 2008, producing 68.5 yards of product. The total of product produced in 2008 was 1,356 yards (~3,593 tons).
