COMMENTS: The OCEPD's Inspector Norma Ali, met with Terry McGlashan, President/owner of the facility, and Bruno Ferraro, consultant from Grove Scientific and Engineering. The annual compliance visual emission test was conducted for 60 minutes. A 45 Lb dog was cremated. No visible emissions or objectionable odors were noted during today's test. Observed Opacity = 0%. Temperature charts were reviewed from August 2012 to July 2013. All temperatures indicated a secondary temperature greater than 1600° F as required by the permit. During today's test the start Temperature was 1638°F the end temp. was 1653°F. The facility appeared to be in compliance at the time of inspection.
