COMMENTS: On December 27, 2011 I visited this facility to conduct the annual compliance inspection. On site I met Reina Smith, the manager of the facility. No leaks were detected in the Dry Cleaning Machine. Perc purchase receipts and yearly perc consumption records were available. Halogen leak detector was available in working condition. Facility is equipped with two perc operated dry cleaning machines and one hydrocarbon operated dry cleaning machine. An state permit application was handed to Ms. Smith because the entitlement will expire on February 5, 2012.
