**COMMENTS:** 12/19/11 - Air Quality performed an annual inspection of the facility and discovered the front door to be locked. No one was in the building. Air Quality attempted to enter the west side of the property, but the side gate was chain locked. Through the chain link locked fence it was observed that the only two bay doors were closed. There was no indication from the front of the building that the facility was out of business. Through the window I could see an unlit office with blueprints on top of tables indicating the company was possibly still in business. A call was placed to the business and the RO, Michael Irvin, but the phone number was disconnected. Based on the DOS website, the business license is still active. A second attempt will be made by Air Quality to contact the facility between 12/25/11 and 1/1/12.[jm]
