PART I: <u>INSPECTION COMPLIANCE STATUS</u> (check 🗹 only one box)	
IN COMPLIANCE IMINOR Non-COMPLIANCE SIGNIFICANT Non-COMP	LIANCE
PART II: ONSITE INTRODUCTORY MEETING	(check 🗹 only one
1. Name(s) of facility representative(s): <u>Liam Smith</u>	box for each question)
Brief Notes:	
 Is the Authorized Representative still LIAM SMITH? If no, who is?: 	YesNo

	If different, did the facility provide an administrative update within 30 days? Is the facility contact still ? If no, who is?:	☐ Yes ⊠ Yes	□No □No
4.	Will facility be conducting VE test(s) during today's inspection?	⊠ Yes ⊠ Yes	□No □No

Emissions Unit Section <u>1 – Human Crematory-unit#1w/prim/2ndary chmbrs,NG fired,150lb/hr</u>

P	ART I: FILE REVIEW PRIOR TO INSPECTION	(check 🗹 box for each	only one question)
1.	a. Complete AC application or, if no AC permit, initial GP registration received on or after August 30, 1989?b. If yes, were design calculations provided then to confirm a sufficient volume in the	Xes Yes	No
3.	secondary chamber combustion zone to provide for at least a 1.0 second gas residence time at 1800 degrees Fahrenheit? Crematory unit installed after February 1, 2007? Date of last inspection: 8/26/2011	⊠ Yes □ Yes	□No ⊠No
4.	Past Visible Emissions (VE) tests:a. Was a VE test performed within each of the past 4 calendar years?b. Has a VE test been performed yet within the current calendar year?c. If first year of operation, was a VE test performed within 30 days of commencing	⊠ Yes □ Yes	□No ⊠No
	operation? 🛛 N/A	Yes	□No
	 d. Date of last VE test: 3/26/2011 e. Was the VE test report filed with the compliance authority no later than 45 days after the test? f. Did the facility demonstrate compliance during the last VE test? If no, what was the problem (if known)? 		□No □No
P	ART II: <u>VISIBLE EMISSIONS TESTING</u>	(check 🗹 box for each	only one question)
P ₂	ART II: <u>VISIBLE EMISSIONS TESTING</u> Was a visible emissions test conducted by the facility for this unit during this site visit?	box for each - Xes Yes Yes	
P ₂	Was a visible emissions test conducted by the facility for this unit during this site visit?	box for each → Yes → Yes → Yes → Yes	question)
1.	 Was a visible emissions test conducted by the facility for this unit during this site visit?	box for each Yes Yes Ves Nes in any one-hour) Ves Yes Yes Yes	question)
1.	 Was a visible emissions test conducted by the facility for this unit during this site visit?	box for each → Yes → Yes	question) No No No No No No

If yes, what reason?

Р	ART III: MONITORING/RECORDKEEPING REQUIREMENTS	(check ☑ box for each	2
1	. Were there any objectionable odors detected? An upwind/downwind survey of the facility was conducted. The observed parameters were:	Yes	⊠No
	Downwind odor level detected- Wind direction - Upwind odor level detected-	(1-10)	
	. Continuous Monitoring Systems –		
а	Is a continuous temperature monitoring system installed on each unit to record temperatures in the secondary chamber in accordance with the manufacturer's instructions?	Xes Yes	No
b	Is the temperature probe properly placed, at least at the distance where the 1.0 second gas residence time at $\boxed{1,800^1}$ $\boxed{1,600^2}$ degrees was determined?	Yes Yes	No
	(Application of initial notification. Tecerved on of after 8/30/89, Tecerved before 8/30/89)		

PART III: MONITORING/RECORDKEEPING REQUIREMENTS (continued)

c.	Are the following records kept on file, available for inspection, for at least the past two years?		
	1) All temperature measurements	🛛 Yes	No
	2) all continuous monitoring systems, monitoring devices, and performance testing measurements;		
	monitoring system all continuous performance evaluations	🛛 Yes	No
	3) All CEMS or monitoring device calibration checks (last performed on (3/5/2012)	-🛛 Yes	No
	4) Adjustments	🛛 Yes	No
	5) Preventive maintenance performed on systems/devices	Xes Yes	No
	6) Corrective maintenance performed on systems/devices	Yes	No
d.	Are the temperature charts properly documented with operator name, operator indication of		
	when cremation in the primary chamber was begun, date, time, and temperature markings	Xes Yes	No
e.	Was the crematory unit installed after $2/1/07$? If no, skip e.(1) – (3)	Yes	🖾No
	(1) Is the crematory unit equipped and operated with a pollutant monitoring system to automatica	lly	
	control combustion based on continuous in-stack opacity measurement?	Yes	No
	(2) Is the system calibrated to restrict combustion in the primary chamber whenever any opacity		
	exceeds 15% opacity ?	Yes	No
	(3) Has the opacity measurement system been cleaned and checked for proper operation in		
	accordance with the manufacturer's recommended maintenance schedule?	Yes	No

PART IV: SECONDARY COMBUSTION ZONE TEMPERATURES

(check \square only one box for each question)

1.	If the application to construct was <u>BEFORE</u> August 30, 1989 is the: a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber? Yes b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the cremation	No
	process begins in the primary chamber? Yes	No
2.	If the application to construct <u>ON</u> or <u>AFTER</u> August 30, 1989 is the: a. the actual operating temperature of the secondary chamber combustion zone no less than 1600°F	
	throughout the combustion process in the primary chamber? Yes	No
	b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremation process begins in the primary chamber? Xes	No

PA	ART V: <u>ALLOWED MATERIALS</u>	(check 🗹 box for each	
1.	<i>Other than</i> human or fetal remains with appropriate containers or clothing, are any materials, including biomedical wastes, incinerated in the unit?	Yes	XNo
2.	Do cremation containers contain no more than 0.5 % (percent) by weight chlorinated plastics as certified by the manufacturer?	⊠ Yes ⊠ Yes	□No □No

PART VI: EQUIPMENT MAINTENANCE	(check ☑ box for each	•
1. Is the crematory unit maintained in accordance with the manufacturer's specifications?	Yes	No
2. Is there a written plan onsite which addresses the operating procedures during startup, shutdown and malfunction?	Yes Yes	No
3. Does the crematory allow for a visible check on the flame characteristics?	- 🛛 Yes	No
If no, skip a. – b. a. Was the flame characteristic visually checked at least once during each operating shift? b. Was the flame adjusted when necessary?		□No □No

PART VII: <u>EU INSPECTIO</u>	N COMPLIANCE STATUS (check	☑ only one box)
IN COMPLIANCE	MINOR Non-COMPLIANCE	SIGNIFICANT Non-COMPLIANCE

Emissions Unit Section 2 - Human Crematory-unit#2w/prim/2ndarychmbrs,NG fired,150lbs/hr

PART I: FILE REVIEW PRIOR TO INSPECTION	(check 🗹 box for each	only one question)
 a. Complete AC application or, if no AC permit, initial GP registration received on or after August 30, 1989? b. If yes, were design calculations provided then to confirm a sufficient volume in the 	Yes Yes	No
 secondary chamber combustion zone to provide for at least a 1.0 second gas residence time at 1800 degrees Fahrenheit? 2. Crematory unit installed after February 1, 2007? 3. Date of last inspection: 8/26/2011 	⊠ Yes □ Yes	□No ⊠No
 4. Past Visible Emissions (VE) tests: a. Was a VE test performed within each of the past 4 calendar years? b. Has a VE test been performed yet within the current calendar year? c. If first year of operation, was a VE test performed within 30 days of commencing 		□No ⊠No
 d. Date of last VE test: 8/26/2011 	Yes	No
 e. Was the VE test report filed with the compliance authority no later than 45 days after the test? f. Did the facility demonstrate compliance during the last VE test? If no, what was the problem (if known)? 		□No □No
PART II: <u>VISIBLE EMISSIONS TESTING</u>	(check 🗹 box for each	only one question)
 Was a visible emissions test conducted by the facility for this unit during this site visit?	Yes	□No □No □No
c. The visible emission test resulted in an opacity of 0 % for the highest six minute average.d. Did the visible emission test demonstrate compliance with the limit?)No
 2. Was a visible emissions test conducted by the inspector during this site visit?	Yes	□No □No □No

6	_	
c. The visible emission test resulted in an opacity of 0 % for the highest six minute average.		
d. Did the visible emission test demonstrate compliance with the limit?	\boxtimes	Yes
	-	

3. Is there any reason to ask for a special test to determine compliance with the PM and CO standards?

If yes, what reason?

PA	ART III: MONITORING/RECORDKEEPING REQUIREMENTS	(check ☑ box for each	2
1.	Were there any objectionable odors detected?	Yes	🖾No
	An upwind/downwind survey of the facility was conducted. The observed parameters were: Downwind odor level detected- Wind direction - Upwind odor level detected-	(1-10)	
2.	Continuous Monitoring Systems –		
a b	Is a continuous temperature monitoring system installed on each unit to record temperatures in the secondary chamber in accordance with the manufacturer's instructions?	🛛 Yes	No
	time at \boxtimes 1,800 ¹ \square 1,600 ² degrees was determined?	🛛 Yes	No

...No

🖾..No

Yes

PART III: MONITORING/RECORDKEEPING REQUIREMENTS (continued)

c.	Are the following records kept on file, available for inspection, for at least the past two years?		
	1) All temperature measurements	🛛 Yes	No
	 all continuous monitoring systems, monitoring devices, and performance testing measurements; monitoring system all continuous performance evaluations	 ∑ Yes → Yes ∑ Yes ∑ Yes 	 No No No No
	6) Corrective maintenance performed on systems/devices	🛛 Yes	No
d.	Are the temperature charts properly documented with operator name, operator indication of		
e.	when cremation in the primary chamber was begun, date, time, and temperature markings Was the crematory unit installed after $2/1/07$? If no, skip e.(1) – (3)	⊠ Yes □ Yes	□No ⊠No
	(1) Is the crematory unit equipped and operated with a pollutant monitoring system to automatical control combustion based on continuous in-stack opacity measurement?	lly Yes	No
	(2) Is the system calibrated to restrict combustion in the primary chamber whenever any opacity exceeds 15% opacity ?	Yes	No
	(3) Has the opacity measurement system been cleaned and checked for proper operation in accordance with the manufacturer's recommended maintenance schedule?	Yes	No

PART IV: SECONDARY COMBUSTION ZONE TEMPERATURES

(check \square only one box for each question)

1.	If the application to construct was <u>BEFORE</u> August 30, 1989 is the: a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber? Yes b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the cremation	No
	process begins in the primary chamber? Yes	No
2.	If the application to construct <u>ON</u> or <u>AFTER</u> August 30, 1989 is the: a. the actual operating temperature of the secondary chamber combustion zone no less than 1600°F	
	throughout the combustion process in the primary chamber? Xes	No
	b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremation process begins in the primary chamber? Xes	No

PART V: <u>ALLOWED MATERIALS</u>			only one question)
1.	<i>Other than</i> human or fetal remains with appropriate containers or clothing, are any materials, including biomedical wastes, incinerated in the unit?	Yes	XNo
2.	Do cremation containers contain no more than 0.5 % (percent) by weight chlorinated plastics as certified by the manufacturer?	⊠ Yes ⊠ Yes	□No □No

PART VI: EQUIPMENT MAINTENANCE	(check ☑ box for each	-
1. Is the crematory unit maintained in accordance with the manufacturer's specifications?	🛛 Yes	No
 Is there a written plan onsite which addresses the operating procedures during startup, shutdown and malfunction?	Yes	□No □No □No □No

PART VII: <u>EU INSPECTION COMPLIANCE STATUS</u> (check <i>I</i> only one box)				
IN COMPLIANCE	MINOR Non-COMPLIANC	CE SIC	INIFICANT Non-COMPLIANCE	

Facility Section (continued)

SPECIAL CONDITIONS AND PROCEDURES	(check 🗹 box for each	only one question)
 <u>Administrative Changes</u>: 1. Were there any changes in the name, address, or phone number of the facility or authorized representati associated with a change in ownership or with a physical relocation of the facility or any emissions unit operations comprising the facility; or any other similar minor administrative change at the facility? 	s or	XNo
2. If yes, did the facility provide written notification within 30 days of the change? New or Modified Process Equipment or Change in Ownership:		No
 3. Since the last registration form submittal has there been		⊠No ⊠No ⊠No ⊠No ⊠No
submitted 30 days prior to the change?	Yes	No

Assefa Hailemariam

3/16/2012

Date of Inspection

~12/31/2013

Inspector's Signature

Approximate Date of Next Inspection

COMMENTS: The inspector, Mr. Assefa Hailemariam, met with Mr. Liam Smith, Care Center Manager and Stephen Boelzner Cremator Operator, representing Baldwin Fairchild Funeral Home, and Dale Wingler, V.E. reader from Southern Environmental Sciences, Inc., at 301 NE Ivanhoe BLVD, Orlando, Florida 32804 on March 16, 2012, to audit the annual compliance visible emission test and records review of the facility. A facility walk-through was conducted to observe operating conditions and records review was conducted. This facility is a crematory for small to large Humans. The facility has two emissions units which were manufactured by Crawford, (EU001) and Mathews, (EU002). Both units were operating at designed capacity of 150 lbs/hr and the units use natural gas for fuel. The crematory incinerators, or the emissions units, all were tested for visible emissions, no plastic containers are used during the cremation process and the observed opacity was 0% for both units. The emission units were operating at or above the required temperature of 1600 degrees Fahrenheit. The current permit and temperature charts and maintenance log book for all units were provided to the inspector by facility. No leaks or spills were observed during our walk-through of the facility and all areas were clean. Facility provided logs book from 2009 to present. (Under the permit, the facility is required to keep the last two years of chart records, while the rest of the records are stored in the facility storage). These records show the operating secondary chamber temperature was greater than 1600 degrees Fahrenheit. The facility appears to be in good operating condition with their permit requirements at this time and no objectionable odors noticed.
