| <b>B</b> . The total quantity of perchloroethylene (perc) purchased within the preceding 12 months by this dry cleaning facility was 545.5* gallons. |  |   |  |  |  |

|   | RT III: GENERAL CONTROL REQUIREMENTS – Rule 62-213.300 FAC   | (check 🗹 only one box                    |  |  |
|---|--|--|--|--|
| Do  | es the responsible official of the dry cleaning facility:  | for each question)                       |  |  |
| 1.  | Store perc, and wastes containing perc, in tightly sealed & impervious containers?   | □Yes ⊠No □N/A                            |  |  |
| 2.  | Examine the containers for leakage?  | ⊠Yes □ No □ N/A                          |  |  |
| 3.  | Close and secure machine doors except during loading/unloading?  | ∑ Yes □ No                               |  |  |
|   | Drain cartridge filters in their housing or in sealed containers for at least 24 hours prior to disposal?  | □Yes □ No ⊠ N/A                          |  |  |
|   | Maintain solvent-to-carbon ratios and steam pressure for carbon adsorber beds according to the manufacturer's specifications?  | ⊠Yes □ No □ N/A                          |  |  |
|   | ART IV: PROCESS VENT CONTROLS – Rule 62-213.300 FAC efer to Part II-A.14. Classification: page 1 of 4, this form)  |  |  |  |
|   | 1. If the facility classification is a <b>Existing small</b> area source, no controls are requ   | uired. Proceed to Part V.                |  |  |
| 2. If the facility classification is a <u>New small area source</u> , the machine should be equipped with a refrigerated condenser. <b>Complete section A. below.</b> |  |  |  |  |
|   | 3. If the facility classification is a <b>Existing large area source</b> , the machine should be equipped with either a refrigerated condenser or a carbon adsorber. <b>Complete both sections A and B below.</b> Carbon adsorber must have been installed prior to September 22, 1993 |  |  |  |
|   | 4. If the facility classification is a <u>New large area source</u> , the machine should be econdenser. Complete both sections A and B below.  | equipped with a refrigerated             |  |  |
| Α.  | Has the responsible official of all <u>existing large</u> <u>area &amp; new sources</u> :  | (check ☑ only one box for each question) |  |  |
| 1.  | Equipped all machines with the appropriate vent controls?  | - ⊠Yes □No                               |  |  |
| 2.  | Equipped dry-to-dry machines with a closed-loop vapor venting system?  | \Box \Box No \Box N/A                    |  |  |
| 3.  | Equipped the condenser with a diverter valve so airflow will be directed away from the condenser upon opening the door?  | ⊠Yes □No □N/A                            |  |  |
| 4.  | Measured and recorded the temperature of the outlet exhaust stream of a refrigerated condenser on a weekly basis?  | ⊠Yes □No                                 |  |  |
| 5.  | Repaired or adjusted the equipment within 24 hours if the exhaust temperature of the condenser exceeded 45° F?   | ⊠Yes □No □N/A                            |  |  |
| 6.  | Conducted all temperature monitoring after an appropriate cool-down period and after verifying that the coolant had been completely charged?   | - ⊠Yes □No                               |  |  |

| PART IV: PROCESS VENT CONTROLS - Rule 62-213.300 FAC (continued) |  |  |  |  |
|--|--|--|--|--|
| В.   | Does the responsible official of an existing large or new large area source also:  | (check ☑ only one box for each question) |  |  |
| 1.   | Measure and record the exhaust temperature on the outlet side of the condenser located on dry-to-dry, reclaimer, and dryer machines on a weekly basis?   | ⊠Yes □No                                 |  |  |
| 2.   | Measure and record the washer exhaust temperature at the condenser inlet and outlet weekly?  | - ⊠Yes □ No □N/A                         |  |  |
|  | a) Is the temperature differential equal to, or greater than $20^{\rm o}F?$  | □Yes □ No □ N/A                          |  |  |
| 3.   | Measure and record the perc concentration in the exhaust stream weekly at the end of the final drying cycle while the machine is venting to the adsorber, if machines are equipped exclusively with a carbon adsorber?   | □Yes □ No ⊠ N/A                          |  |  |
|  | a) Is the perc concentration equal to, or less than 100 ppm?   | ☐Yes ☐ No ☒ N/A                          |  |  |
| 4.   | Assure that the sampling port on the carbon adsorber exhaust for measuring perc concentrations is at least 8 duct diameters downstream of any bend, contraction, or expansion; is at least 2 duct diameters upstream from any bend, contraction, or expansion; and downstream from no other inlet? | □Yes □ No ☑ N/A                          |  |  |
| 5.   | Equip transfer machines (dryers, reclaimers, and washers) with individual condenser coils?   | - ∐Yes ☐ No ☒ N/A                        |  |  |
| 6.   | Route airflow to the carbon adsorber (if used) at all times?   | □Yes □ No □ N/A                          |  |  |
|  |  |  |  |  |
| <b>.</b>   | DELY DECORDATEDING DECLINEMENTS. D. L. (2.412.400/2) E. C.   |  |  |  |
|  | ART V: <u>RECORDKEEPING REQUIREMENTS</u> – Rule 62-213.300(3) FAC best he responsible official:  | (check ☑ only one box for each question) |  |  |
| 1.   | Maintain receipts for perc purchased?  | Yes 🛛 No                                 |  |  |
|  | Maintain rolling monthly total of yearly perc consumption?   |  |  |  |
| 3.   | Maintain leak detection inspection and repair reports for the following:   |  |  |  |
|  | a) documentation of leaks repaired w/in 24 hrs? or;  | Yes No N/A                               |  |  |
|  | b) documentation of parts ordered to repair leak and leak repaired w/in 2 days and parts installed w/in 5 days of receipt?   | ☐ Yes ☒ No ☐ N/A                         |  |  |
| 4.   | Maintain calibration data? (for applicable direct reading instruments)   | ☐ Yes ☐ No    N/A                        |  |  |
| 5.   | Maintain exhaust duct monitoring data on perc concentrations?  | Yes No N/A                               |  |  |
| 6.   | Maintain a startup/shutdown/malfunction plan?  | ⊠ Yes □ No                               |  |  |
| 7.   | Maintain deviation reports?  | ∑ Yes ☐ No ☐ N/A                         |  |  |
|  | a) Problem corrected?  | Yes No N/A                               |  |  |
| 8.   | Maintain a compliance plan, if applicable?   | Yes No N/A                               |  |  |

## PART VI: <u>LEAK DETECTION AND REPAIRS</u> – Rule 62-213.300 FAC

1. Does the responsible official conduct a weekly (for small sources, bi-weekly) leak

(check ☑ only one box for each question)

| detection and repair inspection?  |                                     |  |  |  |
|---|-------------------------------------|--|--|--|
| 2. Does the facility maintain a leak log?   |                                     |  |  |  |
| 3. Does the responsible official check the following areas for leaks?  a) Hose connections, fittings,     couplings, and valves | tills                               |  |  |  |
| 4. Which method(s) of detection (is/are) used by the responsible official?  |                                     |  |  |  |
| a) Visual examination (condensed solvent on exterior surfaces)  |                                     |  |  |  |
| Danielle D. Owens 12/16/08  |                                     |  |  |  |
| Inspector's Name (Please Print)   | Date of Inspection                  |  |  |  |
| Danielle D. Owens   |                                     |  |  |  |
| Inspector's Signature   | Approximate Date of Next Inspection |  |  |  |

**COMMENTS:** 1) Facility did not have perc purchase receipts on-site. The amount of perc purchaed is entered in a log kept by the facility and the perc purchase receipts are sent to the main office in Melbourne. The facility manger was educated on the recordkeeping requirements and will keep a copy of all perc purchase receipts on-site. 2) Through the use of the Departments halogen leak detector, possible fugitive emissions was noted during the inspection. The facility was instructed to do a throrough leak detection inspection of their machinery, make the necessary repairs, and inform the department of their corrective actions within 14 days of the inspection. 3) It was noted during the inspection that the floor surrounding the perc machines and the hazardous waste storage area is worn and in need of resealing with a solvent-resistant sealer. 4) This inspection was conducted in conjuction with the FDEP Central Distict's Hazardous Waste Section. All hazardous waste finding are documented in a separate report prepared by the hazardous waste inspector.
