Are all perc. containers leak free?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | $\boxtimes$ | Yes | $\Box$             | No | $\Box$      | N/A |  |
| 3. Are all machine doors kept closed and secured except during loading/unloading?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |             | Yes | _                  | No | _           |     |  |
| 4. Are cartridge filters d rained in their housing or in sealed containers for at least  24 hours prior to disposal?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |             | Yes |                    | No |             | N/A |  |
| 5. Has each dry cleaning system installed after December 21, 2005 at an area source, routed the air-PCE gas-vapor stream contained within each dry cleaning machine through a refrigerated condenser and passed the air-PCE gas-vapor stream from inside the dry cleaning machine drum through a non-vented carbon adsorber or equivalent control device immediately before the door of the dry cleaning machine is opened? The carbon adsorber must be desorbed in accordance with manufacturer's instructions.                                                                                                                                                                                                                                                                                                                              |             | Yes |                    | No | $\boxtimes$ | N/A |  |
| 6. Is solvent-to-carbon ratios and steam pressure for carbon adsorber beds maintain according to the manufacturer's specifications?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             | Yes |                    | No | $\boxtimes$ | N/A |  |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |             |     |                    |    |             |     |  |
| PART IV: PROCESS VENT CONTROLS – Rule 62-213.300 FAC (Refer to Part II-A.14. Classification: page 1 of 4, this form)  1. If the f acility classification is an existing small area source, no controls are required. Proceed to Part V.  2. If the facility classification is a new small area source, the machine should be equipped with a refrigerated condenser. Complete section A. below.  3. If the fa cility classification is an existing large area source, the machine should be equipped with either a refrigerated condenser or a carbon adsorber. Complete both sections A and B below. Carbon adsorber must have been installed prior to September 22, 1993  4. If the facility classification is a new large area source, the machine should be equipped with a refrigerated condenser. Complete both sections A and B below. |             |     |                    |    |             |     |  |
| A. Has the responsible official of all existing large area & new sources:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |             |     | (check<br>ox for e |    | •           |     |  |
| 1. Equipped all machines with the appropriate vent controls?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |             | Yes |                    | No |             |     |  |
| 2. Equipped dry-to-dry machines with a closed-loop vapor venting system?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |             | Yes |                    | No |             | N/A |  |
| 3. Equipped the condenser with a diverter valve so airflow will be directed away from the condenser upon opening the door?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |             | Yes |                    | No |             | N/A |  |
| 4. Measured and recorded the temperature of the outlet exhaust stream of a refrigerated condenser on a weekly basis?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |             | Yes |                    | No |             | N/A |  |
| 5. Repaired or adjusted the equipment within 24 hours if the exhaust temperature of the condenser exceeded 45° F?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |             | Yes |                    | No |             | N/A |  |
| 6. Conducted all temperature monitoring after an appropriate cool-down period and after verifying that the coolant had been completely charged?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |             | Yes |                    | No |             |     |  |

| PART IV: PROCESS VENT CONTROLS – Rule 62-213.300 FAC (continued)                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                               |                                                                                                                                                                                 |                                        |

**COMMENTS:** Ms. Sangeeta Sharma and Ms. Danielle Owens inspected this facility on 1/10/2012. This inspection is associted with the FDEP central district Air Section and Hazardous waste section. Ms. Sharma and Ms. Owens talked to Ms. Mari Ross (manager) and walked around the facility. They have 2 perc machines, and 4 filters. All the records (perc purchased reciepts, leak check records, manifests) were seen at the time of the inspection. Ms. Sharma inspected the Air section of the facility (perc purchased reciepts, leak check records). Ms. Owens inspected the Hazardous waste part of the facility (Manifests). There were no air and hazardous waste violations at the time of the inspection.
