COMMENTS: In a compliance inspection conducted on 10/24/2012, AQD staff (E. Susky) observed operations at Imperial Cleaners. The facility has three PERC dry-cleaning machines. Mr. Marlon Thompson was present for the beginning of the inspection and then had his manager accompany staff. The houskeeping has vastly improved since previous years. The spotting board area was properly contained and no leaks were observed. The hazardous drums of waste were observed to be properly labeled and in containment. The REMA vacuum was properly contained and labeled (no wastewater was observed in the containment for the REMA vacuum). The manager had his FDEP dry-cleaning calendar available for review. He stated that they would eventually be removing one of the PERC machines. He was not able to demonstrate his PERC sniffer or provide copies of the waste manifests/PERC receipts.
