CONCRETE BATCHING PLANT

COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2)	COMPLAINT/DISCOVI			
AIRS ID#: 0950132 DATE: <u>12/9/08</u> FACILITY NAME: TARMAC AMERICA/ORLANE FACILITY LOCATION: 339 THORPE RD ORLANDO 32859 OWNER/AUTHORIZED REPRESENTATIVE: TH CONTACT NAME: Steve Malloch / Plant Manager ENTITLEMENT PERIOD: 10/12/2007 / 10/12/ (effective date) (end date)	ERRY LANCASTER PHON PHON '2012	DEPART: <u>1:10 PM</u> TE: (561)504-6787 TE: (407)850-5470		
PART I: INSPECTION COMPLIANCE STATUS (check ☑ only one box) ☑ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE				
 PART II: <u>TESTING/RECORDKEEPING REQUIR</u> (check appropriate box(es)) <u>Stack Emissions</u> Were visible emissions tests conducted during the 62-297, F.A.C.)? Are emissions from silos, weigh hoppers (batcher controlled to the extent necessary to limit visible During visible emissions tests of the silo dust conta a rate that is representative of the normal silo unless such rate is unachievable in practice?4. Are emissions from the weigh hopper (batcher) to this question is "Yes", then continue on to queskip 4.a) and 4.b) and continue on to question 5. a) Was the batching operation in operation duri b) During the visible emissions test, was the bat duration? 5. If emissions from the weigh hopper (batcher) op from the silo dust collector, are the visible emission of the silo dust collector, are the visible emission of the silo dust collector, are that is represented to the silo dust collector, and the silo dust collector. 	his site visit according to EPA M ers), and other enclosed storage a e emissions to 5 percent opacity oblector exhaust points was the lo loading rate, or at least at the mi operation controlled by the silo of estions 4.a) and 4.b) below. If ar .)	Iethod 9 (Ref.: Chapter		

PART II: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414, F.A.C. – (continued)
(check 🗹 appropriate box(es)
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.) Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)
2. Did this facility demonstrate:
a) initial compliance no later than 30 days after beginning operation?
b) annual compliance within 60 days prior to each anniversary of the air general permit notification form submittal date? [Yes] No
 Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits) 3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior to the AGP Notification form submission, and within 60 days prior to each anniversary date? Xes Yes No
 Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.) 4. Was the required test report filed with the department as soon as practical, but no later than 45 days after the test was completed? ∑Yes No

PART III: <u>OPERATING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-210.300(4)(c)2., F.A.C.

(check M appropriate box(es))
1. Is this facility: 1) a stationary (2); 2) a relocatable (2); or does it have: 3) both, stationary and relocatable (2) concrete batching and/or nonmetallic mineral processing plants? (<i>Please check I only one box.</i>)
2. If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (<i>If your answer to this question is YES</i> ,

 <i>then proceed to questions 2.a), thru 2.d), below.</i>)	Yes No Yes No Yes No Yes No Yes No Yes No Yes No
 3. Does the owner/operator of the concrete batching plant maintain a log book or books to account for: a) fuel consumption on a monthly basis? b) material processed on a monthly basis? c) the sulfur content of the fuel being burned (Fuel supplier certifications)? 	⊠Yes □ No ⊠Yes □ No ⊠Yes □ No

PART III: <u>OPERATING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414(2)(a) and (b), F.A.C. (continued)

(check ☑ appropriate box(es))

Unconfined Emissions – (Rule 62-296.320(4)(c), F.A.C.)

- 1. Does the owner /operator of the concrete batching plant take reasonable precautions to control unconfined emissions by:
 - a) management of roads, parking areas, stock piles, and yards, which shall include one or more of the following:

	1)	paving and maintenance of roads, parking areas, stock piles, and yards? Xes No
	2)	application of water or environmentally safe dust-suppressant chemicals when necessary to control
		emissions?
	3)	removal of particulate matter from roads and other paved areas under control of the owner/operator to
		re-entrainment, and from building or work areas to reduce airborne particulate matter? Xes No
	4)	reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of
		particulate matter from stock piles? 🖾 Yes 🗌 No
b)	use	e of spray bar, chute, or partial enclosure to mitigate emissions at the drop point to the truck? Xes No

PART IV: Special CONDITIONS AND PROCEDURES – Rule 62-210.300(4)(d)4., F.A.C. A. New or Modified Process Equipment 1. Since the last inspection has there been a) installation of any new process equipment?-----

/			
b)	alterations to existing process equipment without replacement?	Yes	🔀 No
c)	replacement of existing equipment substantially different than that noted on the most		
	recent notification form?	Yes	🛛 No
d)	If you answered <u>YES</u> to any of the above, did the owner submit a new and complete		
	notification form and appropriate fee (Rule 62-4.050, FAC) to the appropriate DEP or		
	local program office?	Yes	🗌 No

Norma Ali

Approximate Date of Next Inspection

COMMENTS: Norma Ali met with Steve Malloch, Plant Manager and Kelly Folsom, Environmental Engineer from Titan America/Tarmac. Five visual emission compliance test were conducted. Two cement silos, one fly ash silo, each one has a baghouse, and two more baghouses for the mixer. Opacity observed on all points was zero percent. The yard is paved, no PM or odors were noted leaving the property. Some dust was coming out from the drop point from the batching to the mixer conveyor. Inspector pointed out to Kelly Folsom and he was going to check with S. Malloch to correct this problem. See attached pictures.

The facility process an average of 19.25 tons/day (3,500 lbs aggregate + 350 lbs of cement).
