PERCHLOROETHYLENE DRY CLEANERS

## COMPLIANCE INSPECTION CHECKLIST

| INSPECTION TYPE: ANNUAL (INS1, INS2)<br>RE-INSPECTION (FUI)  | COMPLAINT/DISCOVERY (CI)  |  |  |  |  |  |  |
|--|---|--|--|--|--|--|--|
| AIRS ID#: 0571033 DATE: <u>7/23/2012</u><br>FACILITY NAME: VICTORIAN CLEANERS  | ARRIVE: <u>12:50pm</u> DEPART: <u>1:10pm</u>  |  |  |  |  |  |  |
| FACILITY LOCATION: 4920 Newkirk Drive Suite<br>TAMPA 33624-1080<br>OWNER/AUTHORIZED REPRESENTATIVE: AMIN<br>Email:<br>CONTACT NAME:<br>Email:<br>ENTITLEMENT PERIOD: 4/10/2011 / 4/10/2016<br>(effective date) (end date)  |   |  |  |  |  |  |  |
|  | PART I: INSPECTION COMPLIANCE STATUS (check I only one box)         IN COMPLIANCE       MINOR Non-COMPLIANCE         SIGNIFICANT Non-COMPLIANCE   |  |  |  |  |  |  |
| PART II:FACILITY CLASSIFICATION<br>(check $\square$ only one box in A)- Rule 62-2A. 1.Existing small area source<br>dry-to-dry only, x < 140 gal/yr<br>transfer only, x < 200 gal/yr<br>both types, x < 140 gal/yr<br>(constructed before 12/9/91)-3.Existing large area source<br>dry-to-dry only, 140 $\le$ x $\le$ 2,100 gal/yr<br>transfer only, 200 $\le$ x $\le$ 1,800 gal/yr<br>both types, 140 $\le$ x $\le$ 1,800 gal/yr<br>both types, 140 $\le$ x $\le$ 1,800 gal/yr<br>(constructed before 12/9/91)5.Ineligible for General Permit<br>d rop store/out of business/petroleum /<br>facility exceeds above limits | <b>213.300 FAC</b><br><b>2.</b> <u>New small area source</u> $\square$<br>dry-to-dry only, $x < 140$ gal/yr<br>transfer only, $x < 200$ gal/yr<br>both types, $x < 140$ gal/yr<br>(constructed on or after 12/9/91)<br><b>4.</b> New large area source $\square$<br>dry-to-dry only, $140 \le x \le 2,100$ gal/yr<br>transfer only, $200 \le x \le 1,800$ gal/yr<br>both types, $140 \le x \le 1,800$ gal/yr<br>(constructed on or after 12/9/91) |  |  |  |  |  |  |

**B**. The sum of the volume of all perchloroethylene (perc) purchases made in each of the previous 12 months by this dry cleaning facility was 19.30 gallons.

| PART III: <u>GENERAL CONTROL REQUIREMENTS</u> – Rule 62-213.300 FAC   |             |                  | check ☑<br>x for each q |                      |  |
|---|-------------|------------------|-------------------------|----------------------|--|
| 1. Is all perc, and wastes containing perc, in tightly sealed & impervious containers?  | $\boxtimes$ | Yes              | 🗌 No                    | N/A                  |  |
| 2. Are all perc. containers leak free ?   | $\square$   | Yes              | 🗌 No                    | N/A                  |  |
| 3. Are all machine doors kept closed and secured except during loading/unloading?   | $\square$   | Yes              | 🗌 No                    |                      |  |
| <ul> <li>Are cartridge filters d rained in their housing or in sealed containers for at least</li> <li>24 hours prior to disposal?</li> </ul>   |             | Yes              | 🗌 No                    | N/A                  |  |
| 5. Has each dry cleaning system installed after December 21, 2005 at an area source, routed the air-PCE gas-vapor stream contained within each dry cleaning machine through a refrigerated condenser and passed the air-PCE gas-vapor stream from inside the dry cleaning machine drum through a non-vented carbon adsorber or equivalent control device immediately before the door of the dry cleaning machine is opened? The carbon adsorber must be desorbed in accordance with   | _           | ·                |                         | -                    |  |
| manufacturer's instructions.  |             | Yes              | L No                    | N/A                  |  |
| 6. Is solvent-to-carbon ratios and steam pressure for carbon adsorber beds maintain according to the manufacturer's specifications?   |             | Yes              | 🗌 No                    | N/A                  |  |
|   |             |                  |                         |                      |  |
| <ul> <li>(Refer to Part II-A.14. Classification: page <u>1</u> of <u>4</u>, this form)</li> <li>1. If the facility classification is an <u>existing small area source</u>, no controls are required. Proceed to Part V.</li> <li>2. If the facility classification is a <u>new small area source</u>, the machine should be equipped with a refrigerated condenser. Complete section A. below.</li> <li>3. If the fa cility classification is an <u>existing large area source</u>, the machine should be equipped with either a refrigerated condenser or a carbon adsorber . Complete both sections A and B below. <i>Carbon adsorber must have been installed prior to September 22, 1993</i></li> <li>4. If the facility classification is a <u>new large area source</u>, the machine should be equipped with a refrigerated condenser. Complete both sections A and B below.</li> </ul> |             |                  |                         |                      |  |
|   |             |                  |                         |                      |  |
| A. Has the responsible official of all existing large area & new sources:   |             | `                | check ☑<br>x for each q | only one<br>uestion) |  |
| <ul> <li>A. Has the responsible official of all <u>existing large area &amp; new sources</u>:</li> <li>1. Equipped all machines with the appropriate vent controls?</li> </ul>  | $\boxtimes$ | `                |                         | •                    |  |
|   | $\boxtimes$ | bo               | x for each q            | •                    |  |
| 1. Equipped all machines with the appropriate vent controls?  |             | bo<br>Yes        | x for each q            | uestion)             |  |
| <ol> <li>Equipped all machines with the appropriate vent controls?</li> <li>Equipped dry-to-dry machines with a closed-loop vapor venting system?</li> <li>Equipped the condenser with a diverter valve so airflow will be directed away</li> </ol>   |             | bo<br>Yes<br>Yes | x for each q            | uestion)             |  |

| _ |  |             |     |   |    |
|---|--|-------------|-----|---|----|
|   | Conducted all temperature monitoring after an appropriate cool-down period and |             |     |   |    |
|   | after verifying that the coolant had been completely charged?                  | $\boxtimes$ | Yes | N | ٩o |

| PA              | ART IV: PROCESS VENT CONTROLS – Rule 62-213.300 FAC (continued)  |     |      |       |
|-----------------|--|-----|------|-------|
| <b>B.</b><br>1. | <b>For all existing large or new large area sources:</b><br>Is the exhaust temperature on the outlet side of the condenser located on dry-to-dry, reclaimer, and dryer machines measured and recorded on a weekly basis?               | Yes | 🗌 No |       |
| 2.              | Is the washer exhaus t temperature at the condenser inlet and outlet measured<br>and recorded weekly?  | Yes | D No | □ N/A |
|                 | a) Is the temperature differential equal to, or greater than $20^{\circ}$ F?   | Yes | 🗌 No | N/A   |
| 3.              | Is the perc concentration in the exhaust stream inlet and outlet measured weekly<br>at the end of the final drying cycle while the machine is venting to the adsorber,<br>if machines are equipped exclusively with a carbon adsorber? | Yes | 🗌 No | □ N/A |
|                 | a) Is the perc concentration equal to, or less than 100 ppm?   | Yes | 🗌 No | N/A   |
| 4.              | Is the sampling port on the carbon adsorber exhaust for measuring perc concentrations at least 8 duct diameters downstream of any bend,  |     |      |       |
|                 | contraction, or expansion; is at least 2 duct diameters upstream from any bend, contraction, or expansion; and downstream from no other inlet?   | Yes | 🗌 No | N/A   |
| 5.              | Are transfer machines equipped (dryers, reclaimers, and washers) with individual condenser coils?  | Yes | 🗌 No | N/A   |
| 6.              | Is airflow routed to the carbon adsorber (if used) at all times?   | Yes | 🗌 No | N/A   |

| PART V: <u>RECORDKEEPING REQUIREMENTS</u> – Rule 62-213.300(3) FAC   | `   | check 🗹<br>x for each c | only one (uestion) |
|--|-----|-------------------------|--------------------|
| 1. Are receipts maintained for all perc purchased?   | Yes | D No                    |                    |
| 2. Are rolling monthly total s of yearly perc consumption maintained ?   | Yes | No No                   |                    |
| 3. Are leak detection inspection and repair reports maintained for the following:                                |     |                         |                    |
| a) Of any leaks repaired w/in 24 hrs? or;  | Yes | 🗌 No                    | N/A                |
| b) Of any parts ordered to repair leak and leak repaired w/in 2 days and parts installed w/in 5 days of receipt? | Yes | 🗌 No                    | N/A                |
| 4. Is calibration data maintained for applicable direct reading instruments?                                     | Yes | 🗌 No                    | N/A                |
| 5. Is exhaust duct monitoring data on perc concentrations maintained?  | Yes | 🗌 No                    | N/A                |
| 6. Is a startup/shutdown/malfunction plan maintained for each machine?   | Yes | 🗌 No                    |                    |
| 7. Are deviation reports maintained?   | Yes | 🗌 No                    | N/A                |
| a) Problem corrected?  | Yes | 🗌 No                    | N/A                |
| 8. Is a compliance plan maintained , if applicable?  | Yes | 🗌 No                    | N/A                |
|  |     |                         |                    |

| P  | ART VI: <u>LEAK DETECTION AND REPAIRS</u> – Rule 62-213.300 FAC  | (check 🗹 only one   |
|----|--|---|
| 1. | What type of leak detection equipment is used to detect leaks?   | box for each question)  |
|    | Halogenated hydrocarbon detector PCE gas analyzer None used  |   |
| 2. | Is the halogenated hydrocarbon detector or PCE gas analyzer operated according to  |   |
|    | the manufacturer's instructions (manual was available and RO could demonstrate   |   |
|    | procedure) ? 🖂   | Yes 🗌 No  |
| 3. | For major sources is the halogenated hydrocarbon detector or PCE gas analyzer  |   |
|    | operated according to EPA Method 21 ?  | Yes 🗌 No 🖾 N/A  |
| 4. | Is the vapor leak inspection conducted by placing the probe inlet at the surface of  |   |
|    | each component interface where leakage could occur and moving it slowly along  |   |
|    | the interface periphery?   | Yes 🗌 No  |
| 5. | Is the PCE gas analyzer a flame ionization detector, photo ionization detector, or   |   |
|    | infrared analyzer capable of detecting vapor concentrations of PCE of 25 parts per   |   |
|    | million by volume (based on documented specifications) ?   | Yes 🗌 No 🖾 N/A  |
| 6. | Is the halogenated hydrocarbon detector capable of detecting vapor concentrations  |   |
|    | of PCE of 25 parts per million by volume (based on documented specifications) and  |   |
|    | indicating a concentration of 25 parts per million by volume or greater by emitting  |   |
|    | an audible or visual signal that varies as the concentration changes?  | Yes 🗌 No 🖾 N/A  |
| 7. | Are the following dry cleaning system components inspected weekly for perceptible leaks (sight, sn   | nell or touch) while the  |
|    | system is in operation (§63.322(k))?   |   |
|    | (Inspection with a halogenated hydrocarbon detector or PCE gas analyzer also fulfills the requirement for insp   | pection of perceptible leaks)   |
|    | b) Door gaskets and seating 🖾 Yes 🔲 No 🗍 N/A h) Stills 🖾 Y   |   |
| 8. | Are the following dry cleaning system components inspected monthly for vapor leaks using a halog   | enated hydrocarbon detector   |
|    | or PCE gas analyzer while the system is in operation? (Any inspection conducted according to this parage   | graph shall satisfy the   |
|    | requirements to conduct an inspection for perceptible leaks under $63.322(k)$ or $(l)$   |   |
|    | b) Door gaskets and seating       Xes       No       N/A       h) Stills       Xes         c) Filter gaskets and seating       Xes       No       N/A       i) Exhaust dampers       Xes | Yes       No       N/A         Yes       No       N/A |

| PART VI: LEAK DETECTION AND REPAIRS – Rule 6  | 52-213.300 FAC (continued)                               |              |  |  |  |  |
|---|--|--------------|--|--|--|--|
