**COMMENTS:** Orange County Inspector, Norma Ali, met with Kelly Folsom, Environmental Engineer from Tarmac, and Mike Lawhorn, Operations Supervisor, to conduct the annual compliance test for EU003 Flyash silo #2. At 4 pm, the driver of the tanker started pumping material into the silo. Inspector and facility representatives observed a white cloud coming from the baghouse vent, which was above the 5% opacity limit. One of the employees attempted to fix the problem. The problem continued. Inspector informed the Tarmac representatives that the baghouse was still leaking and that they will need to re-schedule the test after they fix the problem. Mr. Folsom took readings for 12 minutes, because he said that we were looking at the baghouse from the wrong angle, The 6-minute average of his readings were 6% opacity. Inspector told Mr. Folsom that he could take readings, but that test was not considered a valid compliance test, since the control device was malfunctioning. The facility should send a letter to Jodi Dittell,

Environmental Program Supervisor, explaining why the facility cannot conduct a compliance test before the end of the year and send notification to reschedule test once the baghouse has been repaired.

This facility missed the annual compliance test in 2007. No batching occurred during this attempted compliance test.
