COMMENTS: Inspector, Norma Ali met with Don Kelly, Plant Manager and Kelly Folsom, Environmental Engineer to audit the visual emission test on Fly Ash Silo #2, which had failed the test back in December 17, 2010.

The observed opacity was 0%

The loading rate = 29.89 tph

On minute 27 the test was stopped when the cover of manhole pop-off valve, high emissions were observed. In less than three minutes, facility employee went up to the top of the silo, found the problem and tightened pop-off valve. We continued with the test, inspector continued observing the full loading of the silo and no emissions were observed.

Roads are paved, sprinklers were on at the raw materials. No objectionable odors or PM was observed leaving the property.

The facility appeared to be operating in good condition at the time of the inspection.
