**COMMENTS:** In a compliance inspection conducted on 08/12/2010, AQD staff (E.Susky) observed activities at Payless Quality Cleaners. The facility has one PERC dry-cleaner on-site. Ms. Bernadette Carmelius accompanied staff on the inspection. Drums of hazardous materials were stored in a crowded area and only one label could be observed. The Rema Vacuum was observed to have some condensation/water collected and AQD staff let Ms. Carmelius know that the water would need to be disposed off as hazardous waste. The facility had their waste manifests on-site and the hazardous material license was properly displayed. However, a PERC sniffer was not available for inspection.
