Inspection Checklist (Part II)**

Dry Cleaning Equipment

Type	Manufacturer	Serial Number	Capacity	Age

Other

1) Facility is operating without Entitlement. A Perchloroethylene Dry Cleaner Air General Permit Notification Form was given to Wilson Rodriguez, manager, at time of the inspection. Mr. Wilson stated Jason Bundy took ownership of the facility in April 2009. The Department was not notified of ownership change and the general air permit was not transferred. 2) Facility does not utilize a halogen leak detector (HDL) to detect leaks. 3) A tray containing muck is open to the atmosphere. Manager was advised to dispose of the muck as hazardous waste. 4) Manager stated that the facility has been operating as a drop-off site, but there is perc in the 2nd chamber of the perc machine. Manager was advised that as long as the facility maintains a perc machine on the premises it is subject to the requirements of the air general permit. 5) It was noted during the inspection that there is a 15-gallon hazardous waste storage container the contained waste. Manager was advised to have the waste disposed of properly by a hazardous disposal facility. 6) Facility has not registered as a drycleaner with the Drycleaner Solvent Clean-up Program and was advised to do so immediately. Manager stated the facility plans to switch to hydrocarbons. He will contact the Department when the switch is made.

The owner, Jason Bundy, called the Department on June 3, 2009 to verify what corrective actions need to be taken. Ms. Owens explained all items listed on the Notice of Potential Non-Compliance to Mr. Bundy.
