COMMENTS: This facility was previously owned by Ewell Industries. The facility is now owned by Cemex. The yard is paved. Sig Bo, Cemex VE reader and Regional Environmental Manager, was present during the compliance test. Sig Bo stated that the sweeper was used this morning. The high winds were blowing some particulate matter (PM) off the property. I requested to Sig Bo to have the sweeper do another pass today. He agreed. Some unconfined emissions were observed at the drop point to the batching trucks. Sig Bo stated the cement gate was sticking and the problem would be fixed by the end of the day. This facility is controlled by a central dust collector. According to Mr. Bo, the central dust collector will be replaced by individual baghouses sometime in the near future. He stated a new notification form would be submitted for all facilities that will be getting the new baghouses. The cement truck loaded 27.38 tons of cement in 45 minutes or 36.5 tph. The observed opacity for the dust collector was zero percent. Darrel Lobin from Orange County EPD was also present during the compliance test.
