COMMENTS: Thirty minute EPA Method 9 visible emissions evaluations were performed on the six animal cremators at Jancy Pet Burial Services on 7/13/07. According to Mr. Carl Begley, Owner, who was present for the testing, each cremator contained 85 Lbs. of animal remains. Permit limit is 75 Lb/Hr. Cremator units tested were 1, 2, 3, 4, 6 and 7.

Temperatures of the digital readouts were compared with the individual unit circular chart temperature recorders. Results were acceptable. Chart recorder records for the previous 12 month period were examined. Operating temperatures were above 1600 Degrees as permit requires. Some of them indicated when maintenance was performed. Dates and times of operation were properly logged on the charts.

Two Consultants were present for the test from Southern Environmental Sciences, Inc.

All units appeared to be in compliance at the time of the testing, all demonstrating 0% opacity, and past records acceptable.

Tiffany (Assistant) will fax proof from the bags supplier to show that the bags that they use are non-chlorinated and no less than 3 mils thick. They are waiting on the manuf. for this info. 7/16/07. NA

On 7/18/07 Jancy faxed a letter from the bags manufacturer stating that the bags are 36x58x3mil and are chloride free.
