**COMMENTS:** The inspector, Mr. Assefa Hailemariam, met with Mr. Carl Begley, owner for Jancy Pet Burial Services, and Todd Clark, consultant from Southern Environmental Sciences, Inc., at 10200 Laughlin Road, Zellwood Florida 32712 on December 19, 2012, to audit the annual compliance visible emission test and records review of the facility. A facility walk-through was conducted to observe operating conditions and records review was conducted. This facility is a crematory for small animals. The facility has fives emissions units and use natural gas for fuel. The crematory incinerators, or the emissions units, all were tested for visible emissions and the observed opacity was 0% for all units. The emission units were operating at or above the required temperature of 1600 degrees Fahrenheit. The current permit and temperature charts and maintenance log book for all units were provided to the inspector by facility. No leaks or spills were observed during our walk-through of the facility and all areas were clean. Mr. Begley provided logs book from 2010 to present. (Under the permit, the facility is required to keep the last two years of

chart records. These records show the operating secondary chamber temperature was greater than 1600 degrees Fahrenheit and all the units' cremation above the manufacturers recommended which is 75 lbs/hr or greater . The facility appears to be in good operating condition and no objectionable odors noticed.
