COMMENTS

Mr. White has purchased a new dry cleaning machine that uses hydrocarbons.

Mr. White has not purchased any perc since October 2006, and has not been operating the perc machine.

As a reminder, as long as the perc machine is on site and the general permit remains effective, the owner is required to comply with record-keeping requirements. If the perchloroethylene has been drained from the machine, and leak and temperature checks are not applicable, weekly records should still be kept noting this fact, until the machine is removed from the facility and the permit is terminated. Additionally, perchloroethylene purchases for the 12 months preceding the decommissioning of the perc machine should be kept and rolling monthly totals should be kept until 12 months after use of the machine.

Upon removal of the perchloroethylene machine from the facility, the owner may want to notify the Department, in writing, of the machine's removal, and request that a final inspection be performed, and that the permit for the perc machine be terminated.

The Facility's current entitlement to use the perchloroethylene general permit expires on February 28, 2008. If the machine will be used, a new notice of intent to use an air general permit needs to be submitted by January 25, 2008.
