| 1. Is all perc, and wastes containing perc, in tightly sealed & impervious containers?   | Yes | 🗌 No                    | N/A                   |
| 2. Are all perc. containers leak free ?  | Yes | 🗌 No                    | N/A                   |
| 3. Are all machine doors kept closed and secured except during loading/unloading?  | Yes | 🗌 No                    |                       |
| <ol> <li>Are cartridge filters d rained in their housing or in sealed containers for at least<br/>24 hours prior to disposal?</li> </ol>   | Yes | 🗌 No                    | N/A                   |
| 5. Has each dry cleaning system installed after December 21, 2005 at an area source, routed the air-PCE gas-vapor stream contained within each dry cleaning machine through a refrigerated condenser and passed the air-PCE gas-vapor stream from inside the dry cleaning machine drum through a non-vented carbon adsorber or equivalent control device immediately before the door of the dry cleaning machine is opened? The carbon adsorber must be desorbed in accordance with manufacturer's instructions. | Yes | No                      | □ N/A                 |
| 6. Is solvent-to-carbon ratios and steam pressure for carbon adsorber beds maintain according to the manufacturer's specifications?  | Yes | 🗌 No                    | N/A                   |

1. If the f acility classification is an existing small area source, no controls are required. Proceed to Part V.

2. If the facility classification is a <u>new small area source</u>, the machine should be equipped with a refrigerated condenser. **Complete section A. below.** 

3. If the fa cility classification is an **existing large area source**, the machine should be equipped with either a refrigerated condenser or a carbon adsorber. **Complete both sections A and B below.** *Carbon adsorber must have been installed prior to September 22, 1993* 

4. If the facility classification is a <u>new large area source</u>, the machine should be equipped with a refrigerated condenser. Complete both sections A and B below.
