COMMENTS: I met with Mr. Sadi Baraz on 10/14/13, and the facility was in operation at the time of inspection. Mr Baraz installed two commercial washing machines last year and has swithced over to washing a majority of the clothes based upon the tags on the garmets that specify machine wash. All other garments or if specified by the customer, he drycleans. Since he has changed his day to day operation on cleaning garments, he has drastically reduced his consumption of Perc purchased/used. After a review of records and a walk through of the facility, I have observed no violations to be noted at the time of compliance inspection.
