**COMMENTS:** In a compliance inspection conducted 7/31/2012, AQD staff (E.Susky) observed operations at Dry-Cleaning Depot. The facility has two PERC dry-cleaning machines. Mr. Carlos Angulo accompanied staff on the inspection. The facility has excellent houskeeping and record-keeping. The drums of hazardous waste were observed in secondary containment and properly labeled. The facility keeps records of their PERC purchases, leak checks, and rolling PERC averages. Mr. Angulo was able to demonstrate his PERC leak equipment (sniffer). The drum of chiller water was also observed in secondary containment. The spotting board area had proper epoxy paint beneath it.
