COMMENTS: In a compliance inspection conducted on 03/21/2014, AQD staff (E. Susky) observed operations at Broward Shipyard. Mr. Albert Hernandez (operations manager) was on-site, however since he was overseeing the transport of a vessel he did not accompany staff on the inspection. The facility is a large boat yard with a hangar, dockage, yard, hazardous storage area and offices. The facility works on large yachts. Housekeeping was okay. AQD staff spoke with a worker attending to the hazardous storage area. (bermed) There was evidence of some spillage in the hazardous storage area, however the worker was utilizing absorbent pads to saturate the spillage.
