**COMMENTS:** In a compliance inspection conducted on 7/17/2008, AQD staff observed activities at Marine Max/Associated Marine. Mr. Don Kingston accompanied staff on the inspection. The facility is a marina that conducts bottom painting and some boat repair. The facility has one large boat hangar, one small spray booth (in hangar), a paved yard with boat pull/recycling system and hazardous storage area. Mr. Kingston stated that the facility is in the process of moving its hazardous storage area and waste oil tank inside the hangar due to the city conducting an inspection and stating the site was not properly laid out for zoning.

Mr. Kingston submitted VOC records and the facility is under their permit threshold. He stated that they do have a small amount of resin on-site for patch ups.

Houskeeping was very good.
