| COMMENTS: The purpose of the visit was an annual inspection. We found the following:  1. The record keeping of the Perc purchase was very good and organized.  2. The gauge temperature reading was recorded weekly with an average of 44 F with none of the reading were above 45  3. The vicinity around the dry cleaning machine was very clean and well maintained. |                                     |  |  |  |  |  |

- The Perc was loaded directly with a hookup connection. No container of perc was at the site. 4.
- The monthly perc consumption was recorded correctly and the total for past 12 months was 160 gallons and it was verified. 5.
- 6. The machines were not in operation today. No leaks or odors were noticed.
- The waste from the dry cleaning machine was properly store in the tight lid containers to be disposed in accordance with 7. regulations.
- 8. This facility classified as a large area source.
