COMMENTS: I met with Mr. Chad Edwards, owner. Records were reviewed at the facility and appeared to be in compliance with Air general permit requirements. Perc wastes were observed to be in closed containers and a leak detector is present on-site. Mr. Edwards said that he plans on buying a new machine by the beginning of next year. He said that his current machine has used a little more Perc now than it used too. A leaking hose was repaired earlier in the year. I reminded Mr. Edwards to keep up with his leak checks and repair any leaking parts. Also, record repairs made to the machine in the FDEP compliance calendar.
