**COMMENTS:** On July 19, 2013 I visited this facility to conduct the annual compliance inspection. On site I met Jose perez, the Lift Station Operator. This facility operates with six Diesel-Fueled Engines and eight electric engines. The diesel fuel usage for the year 2012 was 113,046 gallons. On July 18, 2013 five diesel engines were running due to high water flow caused by heavy rain. Three electrical pumps were running simultaneously in order to retain rain water.
