COMMENTS: In a compliance inspection conducted on 5/31/2007, AQD staff oberved operations at The French Connection Dry Cleaning. The facility keeps good records of temperature readings, however they had other haz-mat issues (expoxy paint around machine, spotting board). They also had water from their boiler leaking to the ground. The facility information was refered to Ron King in the Environmental Response Section as part of the Dry-Cleaning Coalition.

AQD staff was accompanied by Pamela Rogeers (owner) and she was informed of the areas where she would most likely need to incorporate changes.
