**Subject:** Inspection

Joe,

As we discussed over the phone, We have temporarily suspended all manufacturing of Cultured Marble. Due to the current state of the housing market, and the drastic increase in Polk County impact fees, our business has dropped off to near zero. Our last purchase of resin or gel-coat was prior to November of 2007 (before your last inspection). If construction in Polk County does not return soon, We may decide not to renew our permit and discontinue manufacturing Cultured Marble. The reason you have not been able to make contact at our shop, is because I have had to take employment from another company to provide income for my family and keep up with all of the bills associated with a business. The only thing happening at our shop is keeping the grass mowed.

Sincerely,

Louis Valvo
