INSPECTION COMMENTS/RECOMMENDATIONS:

Mr. Allen Rainey, Environmental Specialist with the Air Program, met with Jim Armstrong, Plant Supervisor, Ready-Mix. Mr. Rainey explained that he had just visited Prestige AB Management Co. to the north of this plant regarding enforcement action, and he asked to see the facility operation and maintenance plan that Tarmac plants in the Department's SE District were required to develop as a corrective action under a Consent Order, OGC #06-1059. Mr. Armstrong provided the manual for Mr. Rainey's review. Mr. Rainey asked Mr. Armstrong to accompany him on a brief walk-through of the facility paved areas. Mr. Armstrong indicated the plant was not in operation during this visit but processed 28 yards of material earlier that day. Mr. Rainey noted that the paved areas were mostly dry but did not have any accumulated particulate matter. The aggregate storage area is paved. A passenger truck drove by and did not create any dust emissions. Mr. Armstrong stated deliveries of rock are made to the plant by railroad on Mondays, Wednesdays and Fridays. He indicated a sweeper is used as needed to control the accumulation of particulate matter.

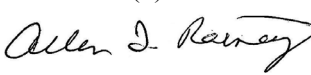

Facility-wide Conditions:

No pollution control device appeared to be circumvented or improperly operated.

No areas were observed where precautions had not been taken to minimize pollutant emissions or prevent the release of unconfined particulate.

No objectionable odors were detected on or off the site.

No visible emission were observed coming from the various exhaust stacks. A method-9 observation was not necessary.
