COMMENTS: In a compliance inspection conducted on 1/24/2012, AQD staff (E.Susky) observed operations at Certified Metal Finishers. The facility has a chromic acid bath and they facility measures the surface tension. The facility keeps accurate records and submitted it during the inspection. The surface tension is below 45 dynes and is at 33.5 dynes per centimeters. Mr. Larry Kaufman accompanied staff on the inspection. The facility also noticed that in early January, 2012 the facility replaced the chromic acid bath. It was noted on the records. Houskeeping was good.
