COMMENTS: •During the inspection of this facility, I met with the responsible official, Robert Yates.

- I reviewed the calendars, 2007 and the new 2008 calendar, that Mr. Yates had come by and gotten a copy of from the A.Q office for th the perchloroethylene usage, temperature and observation checks were up to date. The current Perc 12- month total was 56.3 gallons. Mr. Yates stated there has also been more reduction of dry cleaning; due to the economy at this time
- The temperature observation and checks were recorded as < 7°C during the cool down cycle. Mr. Yates stated it some times is as low as 2°C. I told him to record the temperatures as he observed them. I looked at the purchase invoices and waste manifest records. Safety Kleen picks up the waste , and the most recent waste manifest Invoice for 15 gallons on 12/5/2007 and 9/10/2007
- Mr. Yates has a Halogen Hi Tech 300 meter, which he states is what he uses weekly to check for Perchloroethylene leaks.
- Mr. Yates renewed his permit registration/notification and the permit had been processed,, the new expiration date for 1030376-003AG is 2/4/12
- I observed the dry cleaning equipment during operation. The dryer was in operation at the time of inspection finishing the drying cycle. I did not detect perchloroethylene odors during the observation behind the dryer.
- Mr. Yates has a new Aqua Gone water evaporator for filtering his water. It was covered and sitting in the secondary containment.
- The Hazardous waste containers were located in the boiler room outside of the shop, in secondary containment vessels
- The used second dry cleaning Model RS-373 machine was not operational at this time. He stated he was done using it for parts. The equipment still does not contain any Perc and was not connected to any utilities. It is partially dismantled as some parts had already been disconnected for use on the operational dry cleaning machine.
- I gave Mr. Yates the P2 booklet, water separator memo from FDEP and the calendar link for next year will probably be the same.

The facility appears to be in compliance at this time.
