In order to demort days prior to the (Rule 62-296.401) In order to demort completed within a) Carbon Monot volume, dry basis 10 (Ref.: Chapter b) Oxygen test pto Particulate material dry standard cubic (Ref.: Chapter.62) Was all emissions capacity? Was CO & PM control 	bjectionable odor(s) detected?- issions test conducted during the strate individual source complex (S)(i), F.A.C.) instrate individual source complex (S)(i), F.A.C.) instrate individual source complex (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant to the AGP Notice (CO) emissions equal to constant the AGP Notice (CO) emissions	his site visit according to EPA Meth- liance, was an annual visible emissission, and within 60 days prior to ea- liance were the remaining applicable tification form submission? (Rule 60 or below the requirements of 100 paurly average basis and tested accordent to 40 (Ref.: Chapter 62-297, F.A. equal to or below the requirements of to 7% O ₂ and tested according to	ons test conducted 60 ich anniversary date? e standards testing 2-210.300(4), F.A.C.) irts per million by ling to EPA Method c.)? i of 0.080 grains per EPA Method 5 recommended tical crematory unit?	<pre></pre>

PART III: <u>OPERATING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.401, F.A.C. (check ☑ appropriate box(es))	
1. Is there Continuous Emissions Monitoring System (CEMS) equipment installed on each unit to record	temperatures in the
primary and secondary chambers where there is a 1.0 second gas residence time in the secondary chamber co	
accordance with the manufacturer's instructions?	
a) Do temperature probes seem to be properly placed?	
b) Are the following records kept on file, available for inspection for at least two years following the re	cording of such
measurements, maintenance, reports and records?	
1) All measurements (including CEMS)	∐Yes ⊠ No
2) Monitoring device	
3) Performance Testing Measurements	
4) CEMS Performance Evaluation	
5) All CEMS or monitoring device calibration checks	
6) Adjustments	
7) Preventive maintenance performed on systems/devices	
8) Corrective maintenance performed on systems/devices	⊠Yes ☐ No
2. Was this crematory unit constructed: (check only one ☑ box)	
a) BEFORE August 30, 1989? (If this box checked, continue on to #3 and skip #4)	
b) ON or AFTER August 30, 1989? (If this box checked, skip #3 and continue on to #4)	
3. If constructed BEFORE August 30, 1989 is the:	
a) secondary chamber combustion zone providing at least a 1.0 second gas residence time @ 1600°F ?	⊠Yes □ No
b) actual operating temperature of the secondary chamber combustion zone no less than 1400°F	
throughout the combustion process in the primary chamber?	⊠Yes □ No
c) cremation in the primary chamber begun after the secondary chamber combustion zone temperature	
is equal to or greater than 1400°F ?	⊠Yes □ No
d) required monitoring equipment installed and operational, and providing continuous monitoring to	
record the temperature at the point or beyond where 1.0 second gas residence time is obtained in the	
secondary chamber combustion zone according to the manufacturer's instructions?	⊠Yes ☐ No
4. If constructed ON or AFTER August 30, 1989 is the:	
a) volume in the secondary combustion zone sufficient to provide at least a 1.0 second gas residence time	ne
@ 1800° F?	☐Yes ☐ No
b) the actual operating temperature of the secondary chamber combustion zone no less than 1600°F	
throughout the combustion process in the primary chamber?	□Yes □ No
c) secondary chamber combustion zone temperature equal to or greater than 1600°F before the crematic	
process begins in the primary chamber?	Yes No
5. Are appropriate cremation containers containing no more than 0.5 % (percent) by weight chlorinated	
plastics used during the cremation of dead human bodies?	⊠Yes ☐ No
a) If the answer to question 4 above is YES, is certifying documentation from the manufacturer that the	_
are composed of 0.5% or less by weight chlorinated plastics kept on file at the site for the duration of	
their use and for at least two years after their use?	Yes □ No
b) Are there any other materials, including biomedical wastes (Rule 62-210.200, FAC) incinerated at	M162 [] 110
this location?	□Yes ⊠ No
6. Have all crematory operators been trained and certified by a Department-approved training program?	⊠Yes □ No
a) Are copies of the training certificates for all crematory operators kept on file at the facility for the du	
of the operator's employment & for an additional two years after termination of employment?	Yes ☐ No
of the operator is employment at for an additional two years after termination of employment:	

PART IV: SPECIAL CONDITIONS AND PROCEDUR A. New or Modified Process Equipment	<u>RES</u> – Rule 62-296.401, F.A.C.	
Since the last inspection has there been a) installation of any new process equipment? b) alterations to existing process equipment with c) replacement of existing equipment substantial recent notification form?	out replacement? \Begin{align*} \Begin{align*} \Pi \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \	
d) If you answered YES to any of the above, did the owner submit a new and complete notification form and appropriate fee (Rule 62-4.050, F.A.C.) to the appropriate DEP or local program office?		
Michael Young	12/19/2006	
Inspector's Name (Please Print)	Date of Inspection	
	12/19/2008	
Inspector's Signature	Approximate Date of Next Inspection
