COMMENTS: An inspection with visible emissions testing observation was conducted for Short Load concrete on Dec. 7, 2011. The testing was conducted by Bill Arlington of Arlington environmental services. The facility has one emissions unit a small cement silo. The cement was loaded at a rate of 38.2 tons per hour. Approximately 8 - 10 tons of cement was loaded during the testing and the pressure was between 8 - 10 psi. No emissions were observed during the testing. The authorized representative for the facility Robert Maine is deceased. The facility personnel explained that the company is still family owned and Mr. Maine's wife is now the sole owner. They requested to keep all the facility contact information the same. No change in ownership is necessary. The facility was found to be in compliance at the time of the inspection.
