# PART III: <u>OPERATING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.401, F.A.C. (check ☑ appropriate box(es))

1. Is there Continuous Emissions Monitoring System (CEMS) equipment installed on each unit to record		
primary and secondary chambers where there is a 1.0 second gas residence time in the secondary chamber c		
accordance with the manufacturer's instructions?		
a) Do temperature probes seem to be properly placed?		
b) Are the following records kept on file, available for inspection for at least two years following the re-	cording of such	
measurements, maintenance, reports and records?		
1) All measurements (including CEMS)	🗌 Yes 🗌 No	
2) Monitoring device	🛛 Yes 🗌 No	
3) Performance Testing Measurements	🛛 Yes 🗌 No	
4) CEMS Performance Evaluation	🗌 Yes 🗌 No	
5) All CEMS or monitoring device calibration checks	🛛 Yes 🗌 No	
6) Adjustments	🛛 Yes 🗌 No	
7) Preventive maintenance performed on systems/devices	🛛 Yes 🗌 No	
8) Corrective maintenance performed on systems/devices	🛛 Yes 🗌 No	
2. Was this crematory unit constructed: (check only one 🗹 box)		
a) BEFORE August 30, 1989? (If this box checked, continue on to #3 and skip #4)		
b) ON or AFTER August 30, 1989? (If this box checked, skip #3 and continue on to #4)		
3. If constructed <b><u>BEFORE</u></b> August 30, 1989 is the:		
a) secondary chamber combustion zone providing at least a 1.0 second gas residence time @ 1600°F?	Yes No	
b) actual operating temperature of the secondary chamber combustion zone no less than 1400°F		
throughout the combustion process in the primary chamber?	🗌 Yes 🗌 No	
c) cremation in the primary chamber begun after the secondary chamber combustion zone temperature		
is equal to or greater than 1400°F?	🗌 Yes 🗌 No	
d) required monitoring equipment installed and operational, and providing continuous monitoring to		
record the temperature at the point or beyond where 1.0 second gas residence time is obtained in the		
secondary chamber combustion zone according to the manufacturer's instructions?	🗌 Yes 🗌 No	
4. If constructed <u>ON</u> or <u>AFTER</u> August 30, 1989 is the:		
a) volume in the secondary combustion zone sufficient to provide at least a 1.0 second gas residence tin		
@ 1800° F?	🛛 Yes 🗌 No	
b) the actual operating temperature of the secondary chamber combustion zone no less than <b>1600°F</b>		
throughout the combustion process in the primary chamber?	⊠Yes 🗌 No	
c) secondary chamber combustion zone temperature equal to or greater than $1600^{\circ}$ F before the cremative		
process begins in the primary chamber?	Yes 🗌 No	
5. Are appropriate cremation containers containing no more than 0.5 % (percent) by weight chlorinated	——————————————————————————————————————	
plastics used during the cremation of dead human bodies?	∐Yes ∐ No	
a) If the answer to question 4 above is YES, is certifying documentation from the manufacturer that the	y	
are composed of 0.5% or less by weight chlorinated plastics kept on file at the site for the duration of		
their use and for at least two years after their use?	Yes No	
b) Are there any other materials, including biomedical wastes (Rule 62-210.200, FAC) incinerated at		
this location?	∐Yes ⊠ No	
6. Have all crematory operators been trained and certified by a Department-approved training program?	Yes 🗌 No	
a) Are copies of the training certificates for all crematory operators kept on file at the facility for the duration		
of the operator's employment & for an additional two years after termination of employment?	🛛 Yes 🗌 No	

### PART IV: <u>SPECIAL CONDITIONS AND PROCEDURES</u> – Rule 62-296.401, F.A.C.

A. <u>New or Modified Process Equipment</u>		
1. Since the last inspection has there been		
a) installation of any new process equipment?	Yes	No
b) alterations to existing process equipment without replacement?	Yes	No
c) replacement of existing equipment substantially different than that noted on the most recent notification form?	Yes	No
d) If you answered <u>YES</u> to any of the above, did the owner submit a new and complete		
notification form and appropriate fee (Rule 62-4.050, F.A.C.) to the appropriate DEP or		
local program office?	Yes	No
2. If a crematory unit has been modified to the extent that a Department air construction permit		
was required, have all operators been retrained to operate the modified unit?	Yes	No
3. In the case of new or modified equipment, where a Department air construction permit was		
required, has the owner submitted copies of all operator training certificates?	Yes	No
a) submitted within the 15 day required window following the training?	Yes	No

#### COMMENTS:

1. The PowerPak II crematory unit was not in operation upon my arrival. During my review of records, a cremation was started. The digital display showed 1,686 degrees F., and the chart recorder was within range.

2. Questions in Part II, numbers 3 - 8, Part III, number 3 and Part IV, numbers 1(d), 2 & 3 are not applicable.

3. Performed random review of temperature chart records from January 2007 to the present. There are three to four cremations per date and as many as ten cremations per chart. The recordings show cremations occurred at 1,700 degrees F. The charts are copied to the back of a cremation request form, and the original is destroyed. Notations for crematory operator and cremation time are recorded on the form, not the chart. Sometimes, the crematory operator notation is missed. Advised Mr. Amman that a mark needs to be made on the chart to indicate cremation starting time. All the charts display a fast temperature rise to 1,700 degrees F. and steady temperature regulation.

4. On 2/6/08, a Service & Repair Preventative Maintenance Inspection contract was purchased by the facility from Mathews. It provides for tri-annual inspections of the refractory, mechanical components, electrical components, calibration, safety evaluations, and documentation of services performed. Mr. Amen is currently renewing the contract for this year.

5. Reviewed repair and calibration invoices as provided by Mr. Ammen. The records indicate that the crematory floor was replaced on 3/29/07 and that a flame electrode was replaced on 5/6/08. Facilty staff replaced an electrical afterburner control component on 2/24/09. Reractory parts were replaced last week, but no records were yet available.

6. Mathews Cremation Service is handling the re-registration for the facility.

7. Documentation for chlorinated plastic content of containers incinerated were not made available. I have requested that copies of MSDSs for all containers that are incinerated be provided within two weeks.
