COMMENTS: On December 14, 2011 I visited this facility to conduct the annual compliance inspection and to attend the visible emissions tests. On site I met Ken Adair, the Crematory Operator. William Arlington from Arlington Environmental Services conducted the VE tests. Previously on December 13, 2011 I visited this facility for the same reason. But the crematory temperature was 1210 degrees F and there was only one dead body available for cremation. Therefore, the VE test was reschedule for December 14, 2011. Facility has two crematories operating, unit one was at 1625 degrees F, and unit two was at 1655 degrees F. Thermocouple was calibrated on December 5, 2011. No objectionable odor was detected inside or outside the facility.
