COMMENTS: New owner took over seven months ago. Owner told us that he sent an application but after follow up we found out that owner did not send an application to Tallahassee. Provided an application and told the owner to make a copy of the application filled out and send the application certified mail as soon as possible. New owner could not provide to us any records or a halogen leak detector during our inspection. Gave the new owner a calendar for 2009 and told me that he needed to obtain a halogen leak detector or have someone who has a halogen leak detector check the machine once a month. Left the annual compliance certification form with owner and explained to him that he needed to fill it out and send it back to me as soon as possible. Will return to do a reinspection in the beginning of April of 2009.
