COMMENTS: I met with the facility contact manager Julie Stein, the responsible official, Mr. James Robinson was not present at the shop at this time.

- I observed the dryers were not in operation at this time. There were no Perc odors detected during the observation of the facility. The equipment appeared to be in good condition; no leaks were observed, during the check with the Halogen leak detector.
- The third dryer used a petroleum solvent Exxon 2000. It was no longer on site, the Sail Star, was taken by the bank and sold to another company.
- Mrs. Stein obtained the calendar records. She stated that she does not maintain the records, that Mr. Robinson did them. I reviewed the 2006 and 2007 calendars for both units 1 & 2.
- The records were up to date. The temperature ranges were between 40 – 42°F for the machines. The purchases and hazardous waste invoices were with the records.
- The Hazardous waste containers closed and sitting within the secondary containment receptacles.
- Mr. Robinson was left the annual certification for signature, and requested he mail the form after he completed.
- I left the Inspection summary and a copy of the rule regarding obtaining a halogen detector by July 27, 2008.
